The World in My Mind, My Mind in the World Igor Aleksander, 2013-11-19 Not consciousness but knowledge of consciousness that is what this book communicates in a fascinating way Consciousness is the thread that links the disappearing gorilla with the octopus suffering from a stomach ache and the person under anaesthetic with a new born baby How these are different yet illustrative of consciousness is revealed in this accessible book by one of the world's leading thinkers and neural computing engineers Igor Aleksander addresses this enigmatic topic by making us understand the difference between what happens to us when thinking consciously and when sort of thinking when dreaming or when not conscious at all as when sleeping anaesthetised or knocked out by a blow on the head The book also tackles the larger topics of free will choice God Freud what is the unconscious inherited traits and individuality while exploding the myths and misinformation of many earlier mind hijackers He shares the journey towards building a new model of consciousness with an invitation to understand 5 axioms or basic ideas which we easily recognise in ourselves The Brain, the Mind and the Self Arnold Goldberg, 2015-05-01 Psychoanalysis enjoyed an enormous popularity at one time but has recently fallen out of favor as new psychiatric medications have dominated the treatment of mental illness and a new interest in the brain and neuroscience begins to dominate the theory as to the cause and cure of mental illness How do we distinguish between the brain the mind and the self In his new book Arnold Goldberg approaches this question from a psychoanalytic perspective and examines how recent research findings can shed light on it He repositions psychoanalysis as an interpretive science that is a different activity to most other sciences that are considered empirical Giving clear coverage of the various psychoanalytic models of the mind and the self Goldberg examines how these theories fare against neuroscientific evidence and what implications these have for psychoanalytic clinical practice The Brain the Mind and the Self A psychoanalytic road map sets up evidence based robust psychoanalytic theory and practice that will give psychoanalysts social workers and practicing psychologists a valuable insight into the future of psychoanalysis Arnold Goldberg M D was born and raised in Chicago and trained at the University of Illinois Michael Reese Hospital and the Institute for Psychoanalysis in Chicago He is recently retired from the Cynthia Oudejans Harris MD chair and Professor of Psychiatry at Rush Medical Center **Rational Religion and Morals: Presenting Analysis of the Functions of Mind, Under the Operations and Directions of Reason** Thomas J. Cullen, 2017 A Philosophical Anthropology Drawn from Simone Weil's Life Writings situates Weil's thought in the time between the two world wars through which she lived and traces Weil's consistent conception of a mind/body dualism in the Cartesian sense to a dualism that places the mind within a carnal part of the soul and establishes an eternal part of the soul as the essence of human beings Helen Cullen argues that in Weil's early conception of human nature her Cartesian conception of perception already shows a glimpse of the eternal Weil's dualistic conception also forms the basis of her political analysis of the left of her time and through working in factories and in the fields she develops a conception of labour as a theory of action and work with a method Weil was influenced by leading thinkers of her time prompting her to do an analysis of current scientific theories Cullen argues that Weil's analysis of Christianity already present in Greek philosophy shows us a theory of identical thought inherited from the East India and China and brought forth by peoples around Israel This theory leads to Weil's analysis developed in *The Need for Roots* of how
