### **Modernizing Academic Teaching and Research in Business and Economics** Jorge Marx Gómez, Marie K.

Aboujaoude, Khalil Feghali, Tariq Mahmoud, 2017-04-25 This proceedings volume brings together the results of a corporate discussion on research academic teaching and education in the field of business and economics in the context of globalization. The contributions examine leadership and sustainability quality and governance and the internationalization of higher education. With a particular focus on business education and business schools, the book discusses the labor market and modernization as well as contemporary trends and challenges. By including both academic papers and contributions from industry, it forges research links between academia, business, and industry.

**Challenging the Chain** N. Bharosa, R. van Wijk, N. de Winne, 2015-04 What is digital business reporting? Why do we need it? And how can we improve it? This book aims to address these questions by illustrating the rise of system-to-system information exchange and the opportunities for improving transparency and accountability. Governments around the world are looking for ways to strengthen transparency and accountability without introducing more red tape, which is a source of growing frustration and costs for businesses. In 2004, the Ministry of Finance and the Ministry of Justice in the Netherlands started to investigate the potential of XBRL (eXtensible Business Reporting Language) as a uniform data standard for business-to-government information exchange. In 2006, there was a comprehensive architecture for Standard Business Reporting (SBR) including the requirements for the information infrastructure. One year later, the first reports in XBRL were successfully delivered to the Tax and Customs Administration and the Chamber of Commerce via a secure infrastructure. Today, millions of business reports are being exchanged using SBR. As a solution, SBR empowers organizations to present a cohesive explanation of their business operations and helps them engage with internal and external stakeholders, including regulators, shareholders, and creditors. Challenging the Chain describes the journey of SBR from challenge to solution. Specialists in the field, flanked by academics, provide detailed insights on the challenges actors faced and the solutions they achieved. In its versatility, this book exemplifies the necessary paradigm shifts when it comes to such large-scale public-private transformations. Policy makers, managers, IT specialists, and architects looking to engage in such transformations will find guidance in this book.
