WATER
and the
UNIVERSE

"I love Masaru Emoto's work with water. It is so pure and simple. It's a perfect example of how our thoughts affect our bodies and our world. Say loving words to water and it smiles; be angry at water and it shrivels. Since we are mostly made up of water, can you imagine how our minds and bodies react to the thoughts and words we use? As Dr. Emoto says, 'All the answers are in water.'"

Committee on Aeronautical and Space Sciences,1962 *Literature and the Metaphoric Universe in the Mind* Nicolae Babuts,2017-07-05 Nicolae Babuts believes that the study of metaphoric thought and literature can be enriched by the application of recent discoveries from neuroscientific c experiments He maintains that

metaphors are neither linguistic formations nor conceptual formations but instead the product of association of images and language. They are a matter of vision. Memory is an essential component in the creation of meaning and is the way the mind receives messages from the outside world. In this process of transferring data from the outside world, the mind's overriding tendency is to integrate and interpret. Thus incoming messages are recognized and given meaning whether they are in harmony with the inner world of the mind or in conflict with it. Babuts argues that the literature we read is related to our perception of reality. And reality has two identities: the physical identity of the outside world and its symbolic identity within memory. The symbolic identity of the outside world is represented internally by the metaphoric universe in the mind. **The Manga Guide to the Universe** Kenji Ishikawa, Kiyoshi Kawabata, Yutaka Hiraga, Verte Corp.
