

Mile2 – Certified Penetration Testing Engineer

May 27 - 31 / 2012
Amman Jordan / IBIS Hotel

Course Overview

CPTEngineer's foundation is built firmly upon proven, hands-on, Penetration Testing methodologies utilized by our international group of vulnerability consultants. Mile2 trainers keep abreast of their field by practicing what they teach. They believe that, during training, an equal emphasis should be placed on both theoretical and real world experience if the student is going to succeed in mastering the necessary skills to become a CPTEngineer. The CPTEngineer presents information based on the 5 Key Elements of Pen Testing: Information Gathering, Scanning, Enumeration, Exploitation and Reporting. System vulnerabilities will be discovered using these tried and true steps alongside the use of the latest hacking techniques. This course also enhances the business skills needed by today's students. It will enable them to identify protection opportunities, justify testing activities, and optimize security controls needed by businesses attempting to reduce risks. mile2 goes far beyond simply teaching students to "Hack". Mere hacking was the norm for classes that were available before mile2's introduced a new methodology in teaching this advanced skill. Our course was developed around principles and behaviors used by malicious hackers. The course is taught with this in mind while keeping the focus on professional penetration testing and ensuring the security of information assets.

Target Audience:

- Network or Systems Administrators
- Security Administrators
- Junior Penetration Testers

Course Pre-requisites:

- Solid TCP/IP knowledge
- 2 years system / network administration
- CompTIA Security+ is preferred but not essential

Knowledge gain:

Upon proper completion of the course, CPTEngineer students will be able to confidently sit for the CPTEngineer certification exam (recommended). Students will enjoy an in-depth course that is continuously updated to maintain and incorporate changes in the security environment. This course offers up-to-date proprietary labs that have been researched and developed by leading security professionals from around the world.
