Smith, Marie Antonios Sassine, 2025-07-24 This edited volume investigates a much needed exploration of women phenomenologists past and present in particular Hannah Arendt Hedwig Conrad Martius Edith Stein and Anna Teresa Tymieniecka The sections covered are devoted to the phenomenological exploration of autobiography subjectivism and posthumanism as dealing with modalities of the real and art poetry and music in particular This volume includes among others a study of the autobiography of Husserl a phenomenological analysis of an immigrant experience a poetic autobiography and a phenomenological recollection of emotions through artistic media Chapters also explore the notions of empathy certain aspects of mental illness and trauma and the experience of patients This book appeals to students and researchers working in applied phenomenology Human Flourishing in a Technological World Jens Zimmermann, 2023-08-23 Human Flourishing in a Technological World addresses the question of human identity and flourishing in the light of recent technological advances The chapters in Part I provide a philosophical theological evaluation of changing major anthropological assumptions that have guided human self understanding from antiquity to modernity How did we move from a religious and mostly embodied anthropology of the person to the idea that we can upload human consciousness to computing platforms How did we come to imagine that machines can actually be intelligent or even learn in

human fashion Moreover what metaphysical changes explain our mostly uncritical embrace of a technological determination of being and thus of how reality works In Part II the focus turns to the practical implications of our changing understanding of what it means to be human Covering some of the most pressing current concerns about human flourishing these chapters deal with the impact of technology on education healthcare disability leisure and the nature of work communication aging death and the nature of wisdom for human flourishing in light of evolutionary biology The volume includes the text of a lecture by virtual reality engineer and computer scientist Jaron Lanier and a discussion between Lanier and other contributors

The Inner Voice in Gadamer's Hermeneutics Andrew Fuyarchuk, 2017-07-15 The inner word in Gadamer's hermeneutics refers to the meaning that exceeds anything explicitly said This explanation has been subsumed within metaphysical and theological parameters of interpretation with little regard for the implication of Gadamer's turn to the living language for understanding the inner word Through examining his phenomenology of the inner word *The Inner Voice in Gadamer's Hermeneutics* reveals its musical rhythmic and tonal dimensions and how they function to harmonize disparate orientations in the middle voice above all for Gadamer those that underlie modes of cognition in both the humanities and the sciences a visual and auditory ethos However understood as constituting the music of language discernible in the middle voice the inner word is also suppressed or forgotten by the technological extension of sight that is print and thus requires a turn of the inner ear or auditory disposition Andrew Fuyarchuk assesses theories of language in evolutionary and cognitive science in light of Gadamer's insights into the nature of thought and he employs them to account for a dimension of language that is inscribed in the lingual minds of our species When recalled by the inner ear this dimension enables us to think such opposites together as we find in the humanities and sciences together This thinking together is expressed in a double account of an object of inquiry such as the one Fuyarchuk puts forward about the inner word in Gadamer's philosophical hermeneutics
