

### MMI Stations: Calculation and Data Interpretation

#### What kinds of questions will there be at a Calculation station?

At these stations, you will be asked simple calculations relating to a clinical scenario – for example, you may need to calculate the correct drug dose to give to a patient, or convert metrics. These questions can take a variety of forms:

- *You are asked to give a patient 1ml of 1% lidocaine. How many mg are you giving the patient?*
- *You are asked to give a patient weighing 50kg a 1mg/kg IV injection. The syringe contains 100mg in 2 ml. What volume of the solution in the syringe do you need to give?*

#### How can I prepare for a Calculation station?

At some medical schools, you won't be given a calculator during this station, so a good way to prepare for these is to practice your mental maths beforehand. You may be given a sheet of paper for your calculations, so practise working out basic sums by hand and completing practice questions, like the ones above.

Be mindful of the units in drug calculations, and practise your conversions between metrics – for example, converting from micrograms to grams and between decimals and percentages. It may be a good idea to memorise some of these basic conversions to assist you (and then get a friend to test you!) such as 1g equals 1000 mg, and so on.

You could also practise some of these conversions, for example:

1. How much is 500mg in grams?
2. How much is 850mcg (micrograms) in mg (milligrams)?

#### How do you convert between units?

In clinical practice one of the most useful type calculations to know how to perform is converting between units.

Example:

You prescribe a patient 1 g of paracetamol. How many milligrams is this?

A: 1 g = 1000 mg

**INTERVIEWS FOR MEDICAL SCHOOL: Multiple Mini Interview (MMI) Practice** Thanthullu Vasu, Shrya Shyam, RISE Foundation Leicestershire, 2023-04-21 Medical interviews have changed a lot with time in the last two decades multiple mini interviews MMIs have revolutionized the assessment strategies for entrance to medical schools MMIs usually consist of 6-10 stations of independent assessments done in a timed circuit so that the same examiner evaluates a specific skill for a station among the candidates Many of these stations assess a candidate's soft skills including critical thinking problem solving team working leadership and professional attitudes in addition to their knowledge skills and motivation towards choosing medicine as a career MMIs are not just a test of a candidate's knowledge or skills but their ability to use it appropriately at the right time Aristotle said we are what we repeatedly do Excellence then is not an act but a habit Candidates wishing to succeed in medical MMI interviews need repetitive practice in the various stations These stations usually include assessments on communication skills medical ethics recent medical facts role play with an empathetic approach data interpretation and calculations scenario based situations personal character motivation and judgment This book will provide an excellent variety of opportunities to practice these stations and guide the candidate with a framework of answers This book can be used for various medical university entrance exams including those in the United Kingdom via the Universities and Colleges Admissions Service UCAS the United States via the American Medical College Application Service AMCA Canada via the respective Medical School Applications Service Australia via the specific state Tertiary Admissions Centre and many other countries via their specific admission pathways Dr Thanthullu Vasu has previously published four medical books alongside many chapters and articles in leading international journals He has founded organized and directed many teaching courses that have received excellent feedback He regularly organizes national MMI courses for candidates applying to medical schools these courses are in high demand and have consistently produced a successful outcome Many of the contributors in the book are team members from the RISE Foundation Leicestershire a charity based in Leicestershire <https://risefoundationuk.com> All the contributors have extensive experience as examiners in many interviews and courses The royalties from the sale of this book will be donated to the RISE Foundation Leicestershire Thank you for buying this book as the money will go towards helping various causes supported by this charity We wish you much success in your interviews and your future medical career

**Earthquakes and Multi-hazards Around the Pacific Rim, Vol. I** Yongxian Zhang, Thomas Goebel, Zhigang Peng, Charles A. Williams, Mark Yoder, John B. Rundle, 2017-12-20 This is the first of two volumes devoted to earthquakes and multi hazards around the Pacific Rim The circum Pacific seismic belt is home to roughly 80% of the world's largest earthquakes making it the ideal location for investigating earthquakes and related hazards such as tsunamis and landslides Gathering 16 papers that cover a range of topics related to multi hazards the book is divided into three sections earthquake physics earthquake simulation and data assimilation and multi hazard assessment and earthquake forecasting

models The first section includes papers on laboratory derived rheological parameters as well as seismic studies in the Gulf of California and China In turn the second section includes papers on improvements in earthquake simulators as well as the statistical methods used to evaluate their performance automated methods for determining fault slip using near field interferometric data variabilities in earthquake stress drops in California and the use of social media data to supplement physical sensor data when estimating local earthquake intensity The final section includes a paper on probabilistic tsunami hazard assessment several papers on time dependent seismic hazard analysis around the Pacific Rim and a paper on induced and triggered seismicity at the Geysers geothermal field in California Rapid advances are being made in our understanding of multi hazards as well as the range of tools used to investigate them This volume provides a representative cross section of how state of the art knowledge and tools are currently being applied to multi hazards around the Pacific Rim The material here should be of interest to scientists involved in all areas of multi hazards particularly seismic and tsunami hazards In addition it offers a valuable resource for students in the geosciences covering a broad spectrum of topics related to hazard research

*Automotive User Interfaces* Gerrit Meixner,Christian Müller,2017-02-27 This book focuses on automotive user interfaces for in vehicle usage looking at car electronics its software of hidden technologies e g ASP ESP comfort functions e g navigation communication entertainment and driver assistance e g distance checking The increased complexity of automotive user interfaces driven by the need for using consumer electronic devices in cars as well as autonomous driving has sparked a plethora of new research within this field of study Covering a broad spectrum of detailed topics the authors of this edited volume offer an outstanding overview of the current state of the art providing deep insights into usability and user experience interaction techniques and technologies as well as methods tools and its applications exploring the increasing importance of Human Computer Interaction HCI within the automotive industry *Automotive User Interfaces* is intended as an authoritative and valuable resource for professional practitioners and researchers alike as well as computer science and engineering students who are interested in automotive interfaces
