### 1 Introduction

This instruction has been written to assist clients maintain the windcube v2.1 lidar. Basic maintenance is required to keep the lidars running at peak performance. This maintenance is not difficult to perform. What is generally more difficult is gaining access to lidar's which are often in remote locations. Therefore, this maintenance is the responsibility of the client, as they are better placed than ART to arrange maintenance with local landholders, stakeholders, or other relevant service providers frequenting the proposed development site.

### 2 Routine maintenance required by client

The information below has been taken from the Windcube v2.1 user guide.

Perform the following care on a regular basis:

Figure: Example of periodic maintenance schedule

#### 1 – Check Window

This relates to window cleaning. Recommended interval is once per month:

- If necessary, clean Windcube window with water or isopropanol (isopropyl rubbing alcohol) and optical tissues.

#### 2 – Fill Container

This relates to Wiper liquid tank refilling. Recommended interval depends on climate and location. As a guide, filling once per two months is recommended. If you are leasing a lidar and power trailer from ART, then the trailer will most likely have 2 x 20L water containers on board:

- Fill the active 20L container (one that has the Windcube submersible pump in it)
