pesticides for use in agriculture and public health FAO and WHO specifications for microbial pesticides based on this manual are developed through the FAO WHO Joint Meeting on Pesticide Specifications JMPS and published on the web sites of the two organizations *Journal of the Association of Official Analytical Chemists* ,1979 Cipac Handbook: Analysis of technical and formulated pesticides compiled by R. deB. critical infrastructure owners and operators as well as risk information flowing from critical infrastructure owners and operators to the government Our study reveals the complex ways information is gathered analyzed packaged and shared among government and the owners and operators of critical infrastructures In tackling this complex subject we examined the different stages of the intelligence cycle including requirements generation information collection analysis and dissemination To gather a variety of perspectives we conducted extensive interviews with security directors chief executives subject matter experts and government executives and managers Recognizing that distinct sector characteristics shape information sharing needs we conducted case studies of five sectors Commercial Facilities Healthcare and Public Health Energy Oil and Natural Gas Banking and Finance and Chemical While we found some information sharing approaches to be effective others were not As a result we adopted a capability maturity approach which acknowledges that different Federal agencies have different abilities to share information effectively and we sought to build on what is working **Smoothness Criteria for Runway**
