Applied Mathematics 1 Formula For Diploma Engineering:

Oxford IB Diploma Programme: Theory of Knowledge Marija Uzunova Dang, Arvin Singh Uzunov Dang, 2020-05-21

With fascinating source material and activities relevant to students' experiences, this book developed directly in cooperation with the IB will help students question the nature of knowing. The importance of TOK to everyday experience and to individual subject area knowledge is highlighted throughout with case studies and tasks that encourage awareness of multiple perspectives. Structured around the new syllabus and the conceptual framework, students will have full opportunity to think critically through complex issues of present-day challenges. Each theme will stimulate questions of power, politics and technology relevant to the changing nature of knowledge. All of the required subject Areas of Knowledge are elaborated with historical development and significant links to current practice. The focal point of The Knower is woven throughout the text and within its own core theme chapter. Students will be able to practice doing TOK throughout each of the five themes to help support an assessment that requires students to develop skills. The assessment Essay and Exhibition have separate chapters to guide students through each step, helping them to gain the most from their TOK course and carry this knowledge throughout their lives.

About the Series: Oxford's IB Diploma Course Books are essential resource materials designed in cooperation with the IB to provide students with extra support through their IB studies. Course Books provide advice and guidance on specific course assessment requirements, mirroring the IB philosophy and providing opportunities for critical thinking.

Mendel 2015 Radek Matoušek, 2015-06-14

This book is a collection of selected accepted papers of Mendel conference that has been held in Brno, Czech Republic in June 2015. The book contains three chapters which represent recent advances in soft computing, including intelligent image processing and bio-inspired robotics. Chapter 1: Evolutionary Computing and Swarm intelligence. Chapter 2: Neural Networks, Self-organization and Machine Learning, and Chapter 3: Intelligent Image Processing and Bio-inspired Robotics. The Mendel conference was established in 1995 and it carries the name of the scientist and Augustinian priest Gregor J. Mendel, who discovered the famous Laws of Heredity. In 2015, we are commemorating 150 years since Mendel's lectures, which he presented in Brno on February and March 1865. The main aim of the conference was to create a periodical possibility for students, academics and researchers to exchange their ideas and novel research methods.

Applied Physics I | AICTE Prescribed Textbook (English) V. K. Yadav, Mina Talati, 2021-11-01

Applied Physics I is a compulsory paper for the first-year Diploma course in Engineering. Force and Motion, Work, Power and Energy, Rotational Motion, Properties of Matter, Heat and Thermometry. Each topic is written in an easy and lucid manner. Every chapter contains a set of exercises at the end of each unit to test the student's comprehension. Some salient features of the book: Content of the book is aligned with the mapping of Course Outcome Programs Outcomes and Unit Outcomes. Book provides lots of interesting facts. QR Code for E-resources. QR Code for use of ICT etc. Students and teacher-centric subject materials are included in the book with balanced and chronological

manner Figures and tables are inserted to improve clarity of the topics Short questions objective questions and long answer exercises of different difficulty levels are given for practice after every chapter Solved numerical examples are provided with systematic steps in each chapter followed by numerical exercises with hints Random Differential Equations in Scientific Computing Tobias Neckel, Florian Rupp, 2013-12-17 This book is a holistic and self contained treatment of the analysis and numerics of random differential equations from a problem centred point of view An interdisciplinary approach is applied by considering state of the art concepts of both dynamical systems and scientific computing The red line pervading this book is the two fold reduction of a random partial differential equation disturbed by some external force as present in many important applications in science and engineering First the random partial differential equation is reduced to a set of random ordinary differential equations in the spirit of the method of lines These are then further reduced to a family of deterministic ordinary differential equations The monograph will be of benefit not only to mathematicians but can also be used for interdisciplinary courses in informatics and engineering A.P.
