Miranker,1957 The subject of this report is the asymptotic theory of solutions u of the reduced wave equation $\Delta u + k^2 u = 0$ defined in infinite domains In Section 1 we furnish new proofs of three well known theorems concerning u These are Rellich s growth estimate the uniqueness theorem for the exterior boundary value problem and the representation theorem A new result the representation theorem for u when the boundary of the domain of definition of u is infinite is also given In Section 2 Rellich s growth estimate is extended to solutions of the equation $\Delta v + k^2 v = 0$ From this result we are able to deduce various uniqueness and representation theorems for solutions of this equation In Section 3 we show that the normal boundary values of a radiating solution u of $\Delta u + k^2 u = 0$ is bounded by a homogenous quadratic functional of its boundary values This result combined with the representation theorem for u yields an L^2 maximum principle for u Finally in section 4 the behavior of u when the parameter k becomes large is considered We explain the method of G Birkhoff for obtaining formal asymptotic expansions for u and deduce several results concerning the existence and validity of these formal expansions *Scientific and Technical Aerospace Reports* ,1989-07 Book catalog of the Library and Information Services Division Environmental Science Information Center.
