Arabic Version Of Beck Depression Inventory:

Arabic Psychological Tests and Their English Versions Ahmed M. Abdel-Khalek, 2020-11-09 Measurement is an important concern for the progress of psychology both as a basic science and as a field of application. The development of psychological research and practice would not be possible without sound assessment and measuring procedures. This book presents a collection of personality and psychopathology scales developed originally in Arabic and translated into English since self-reports and questionnaires play a prominent role in psychological research and practice as they are simple and cost less than other methods of assessment. Furthermore, these scales are suitable in surveys and epidemiological studies with large samples. This book will be useful in different disciplines such as psychology, psychiatry, epidemiology, gerontology, social work, and social sciences.

Adolescent Mental Health in The Middle East and North Africa Caroline Barakat, Fatme Al Anouti, 2022-05-14 This 2-volume set focuses on adolescent health in the Middle East and North Africa region (MENA) and presents the latest research on the health risk behaviours and social behaviours that adolescents from the MENA region engage in. While there has been a surge in peer-reviewed research publications on population health in the MENA region in the last couple of decades, very few books offer a resource to address the diverse negative influences that disproportionately affect adolescents and children in the MENA region, including increased tobacco consumption, culture, low emphasis on physical activity, increased sedentary behaviours, weak health policies, and societal issues related to displacement and political conflicts. These books offer a synthesis of current knowledge on adolescent health issues in the MENA region and aim to provide evidence-informed adolescent health care practices that address current issues related to mental, physical, reproductive, and nutritional health. Volume 1 focuses on mental health in the MENA region, the development and implementation of youth-friendly public policies, and how to strategize in the age of COVID-19. The study will aid health care professionals, policy makers, government organizations, and health program planners to assess current policies and practices related to adolescent health in the MENA region and to identify the best courses of action moving forward.

Religiosity and Subjective Well-being in the Arab Context Ahmed M. Abdel-Khalek, 2019-01-10 Throughout the history of humanity, religion has played an important role as one of the most powerful forces of life, death, health, and disease. In psychology, interest in the study of religion dates back around one and a half centuries. This interest has been driven in large part by the findings of a positive relationship between religiosity and physical and mental health, subjective well-being, happiness, and longevity. Furthermore, religiosity is now a subject in many disciplines such as medicine, psychiatry, sociology, anthropology, education, epidemiology, gerontology, social work, and psychotherapy. This book brings together in one volume the scattered studies of religiosity and subjective well-being carried out in different Arab, mainly Muslim, countries. The vast majority of these articles are empirical research papers and are classified into six sections: namely, Islam and Mental Health; Psychometric Measures; Religiosity, Health, and Happiness; Religiosity, Quality of Life, and Subjective Well-Being; Religiosity and
