Vasilyeva, Maria L. Lagutina, 2016-09-14 Modern trends in geopolitics have raised serious questions about the future global and regional architecture of the world system In the case of the Eurasian Economic Union these questions bring up important issues for debate What is the Eurasian Economic Union What theoretical concepts could be applied for modern Eurasian integration Why is the Eurasian Economic Union forming Most importantly what prospects does this Union have in the framework of the modern geopolitical situation This book explores the process of Eurasian integration in the modern global world The creation of the Eurasian Economic Union has become a topical issue in modern Russian foreign policy Neo Eurasianist ideas can be viewed as a geopolitical basis and rationale for the Eurasian Economic Union that may constitute an integrational structure consolidating the post Soviet area and neighboring regions This book argues that Eurasia is a region representing an organic integrity due to close mentality common and centuries long history common language of international communication a multitude of economic ties and an identical level of technological development across all countries within the post Soviet area Yet advancement of the Eurasian integration idea into practical implementation should have new objective suppositions as well These are defined by the contemporary economic political and ethno cultural processes in the post Soviet space **Television and Presidential Power in Putin's Russia** Tina Burrett, 2010-12-14 As a new president takes power in Russia this book provides an analysis of the changing relationship between control of Russian television media and presidential power during the tenure of President Vladimir Putin It argues that the conflicts within Russia's political and economic elites and President Putin's attempts to rebuild the Russian state after its fragmentation during the Yeltsin administration are the most significant causes of changes in Russian media Tina Burrett demonstrates that President Putin sought to increase state control over television as part of a larger programme aimed at strengthening the power of the state and the position of the presidency at its apex and that such control over the media was instrumental to the success of the president's wider systemic changes that have redefined the Russian polity The book also highlights the ways in

which oligarchic media owners in Russia used television for their own political purposes and that media manipulation was not the exclusive preserve of the Kremlin but a common pattern of behaviour in elite struggles in the post Soviet era Basing its analysis predominately on interviews with key players in the Moscow media and political elites and on secondary sources drawn from the Russian and Western media the book examines broad themes that have been the subject of constant media interest and have relevance beyond the confines of Russian politics *São Paulo Heterotopia* Ulrike Böhm, Katja

**Narrative Space and Time** Elana Gomel, 2014-02-18 Space is a central topic in cultural and narrative theory today although in most cases theory assumes Newtonian absolute space However the idea of a universal homogeneous space is now obsolete Black holes multiple dimensions quantum entanglement and spatio temporal distortions of relativity have passed into culture at large This book examines whether narrative can be used to represent these impossible spaces Impossible topologies abound in ancient mythologies from the Australian Aborigines dream time to the multiple layer universe of the Sumerians More recently from Alice's adventures in Wonderland to contemporary science fiction's obsession with black holes and quantum paradoxes counter intuitive spaces are a prominent feature of modern and postmodern narrative With the rise and popularization of science fiction the inventiveness and variety of impossible narrative spaces explodes The author analyses the narrative techniques used to represent such spaces alongside their cultural significance Each chapter connects narrative deformation of space with historical problematic of time and demonstrates the cognitive and perceptual primacy of narrative in representing imagining and apprehending new forms of space and time This book offers a comprehensive analysis of the connection between narratology cultural theory science fiction and studies of place

**Reexamining Economic and Political Reforms in Russia, 1985-2000** Vladimir Gel'man, Dmitry Travin, Otar Marganiya, 2014-06-25 Reexamining Economic and Political Reforms in Russia 1985 2000 Generations Ideas and Changes analyzes the impact of generational changes and ideational changes on major political and economic reforms conducted in Russia during the late twentieth century This book examines how the policy agenda was shaped by the ideas of the generations representatives for the sixties and seventies Representatives of the generation of sixties conducted reforms from 1985 to 1991 and invested major efforts in political liberalization but did not pay enough attention to economic reforms On the other hand the reformers from the generation of seventies who were in charge of policy making from 1991 to 1998 were genuinely oriented toward market building but rather insensitive to the democratization of the political regime This book explores how these differences in ideational agendas produced inconsistent and controversial outcomes from both stages of reforms **Challenging America's Global Preeminence** Thomas Ambrosio, 2017-07-05 Examining the shifts in Russian foreign policy and their potential impact on the status and influence of the United States in the international system

this outstanding volume examines why the Kremlin initially sought an alliance with the United States and the internal and external reasons why such a policy was unsustainable In particular it looks for an explanation for the post Cold War vacillations in Russian foreign policy Russia made several decisions which were perceived domestically as being unacceptable capitulations to American interests Consequently a pro Western foreign policy became incompatible with Russian political culture The rapprochement following 9 11 was destined to be temporary due to the decision by the Bush administration to invade Iraq Contributing to the fields of international relations and comparative foreign policy this study provides a fresh approach to the balance bandwagon issue and takes into account the global repercussions of the recent war in Iraq It will be of particular value to specialists in Russian foreign policy international relations theory and US foreign policy
