arcserve® Backup

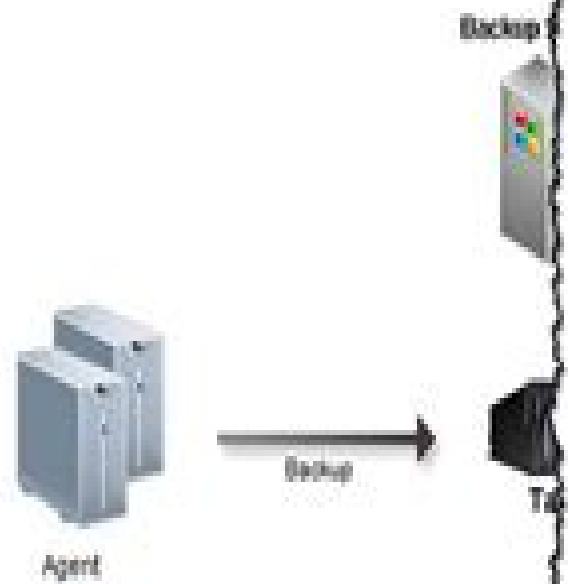

Backing Up Data

You can use Arcserve Backup to back up all of your clients at once, back up only your local host, or select the hosts you wish to back up, including individual data mover servers.

Note: In order to select objects residing on servers for backup, you must first enter the servers into the Client Database. The Arcserve Backup software must be running to add servers to the database.

Use the Backup Manager to:

- Back up clients to various media or create a customized backup scheme.
- Use job filters to selectively exclude or include directories and files from backup jobs.
- Create an automated backup scheme using media rotation. For more information, see Rotation Scheme Configuration.
- Create an automated backup scheme using the Arcserve Backup GFS rotation scheme.

To complete job configuration, make the appropriate selections on the Source, Schedule and Destination tabs, and click on the toolbar to set additional backup job properties. When done, click Submit to submit your job.
