## **Articulating Design Decisions Communicate With Stakeholders Keep Your Sanity And Deliver The Best Experience:**

Articulating Design Decisions Tom Greever, 2015-09-25 Annotation Every designer has had to justify designs to non designers yet most lack the ability to explain themselves in a way that is compelling and fosters agreement The ability to effectively articulate design decisions is critical to the success of a project because the most articulate person often wins This practical book provides principles tactics and actionable methods for talking about designs with executives managers developers marketers and other stakeholders who have influence over the project with the goal of winning them over and creating the best user experience

*Articulating Design Decisions* Tom Greever, 2020-08-03 Talking to people about your designs might seem like a basic skill but it can be difficult to do well In many cases how you communicate with stakeholders clients and other nondesigners may be more important than the designs themselves Because if you can't get their support your work will never see the light of day no matter how good it is This practical guide focuses on principles tactics and actionable methods for presenting your designs Whether you design apps websites or products you'll learn how to get support from people who have influence over the project with the goal of creating the best user experience Walk through the process of preparing and presenting your designs Understand stakeholder perspectives and learn how to empathize with them Cultivate both implicit and explicit listening skills Learn tactics and strategies for expressing the most effective response to feedback Create the right documentation for your decisions to avoid repeated conversations Learn why following through is just as important as the meeting itself

Summary of Tom Greever's Articulating Design Decisions Everest Media, 2022-06-13T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 Designers have been relegated to the business of making pretty pictures but now that UX is everywhere we are thrust into the limelight of product development with our own ideas forming a critical part of the puzzle 2 I began my career in UX by interviewing for jobs as a marketing manager I enjoyed interviewing others about their work and I loved to talk about design I was confident that I knew a lot about design 3 I had to figure out how to communicate to my clients what my designs did I had to answer their questions in a way that made sense to them not me I had to express the rationale behind a design using words that would appeal to them and meet their needs 4 The term user experience designer is a new one that has evolved in meaning over the past decade It is all design and no one knows what they are talking about The point is that we are all constantly adjusting to the changing attitudes and approaches to creating great stuff
