Engineering Materials, Structures, Systems and Methods for a More Sustainable Future Alphose Zingoni, 2025-08-20
Engineering Materials Structures Systems and Methods for a More Sustainable Future comprises 275 papers that were presented at SEMC 2025 the Ninth International Conference on Structural Engineering Mechanics and Computation This event held in Cape Town South Africa from 1 to 3 September 2025 was attended by around 300 participants from 42 countries worldwide The Proceedings are divided into 15 sections The various topics may be grouped into five broad categories covering i the mechanics of materials solids and structures ii numerical modelling computational simulations and experimental testing iii analysis design and construction in the traditional engineering materials iv innovative engineering materials structures and methods v maintenance long term performance life cycle considerations and sustainable construction Engineering Materials Structures Systems and Methods for a More Sustainable Future will be of interest to civil structural mechanical marine and aerospace engineers as well as planners and architects Two versions of the papers are available full papers of length six pages are included in the e book while short papers of length two pages intended to be concise but self contained summaries of the full papers are in the printed book Transforming Construction: Advances in Fiber Reinforced Concrete Viktor Mechtcherine, Cesare Signorini, Dominik Junger, 2024-09-11 This volume highlights the latest advances innovations and applications in the field of fiber reinforced concrete FRC and textile reinforced concrete TRC as presented by scientists and engineers at the RILEM fib XI International Symposium on Fiber Reinforced Concrete BEFIB held in Dresden Germany on September 15 18 2024 It discusses a diverse range of topics concerning FRC and TRC including technological aspects mechanical properties long term performance analytical and numerical models structural design codes and standards as well as practical applications and case studies Sustainable Solutions for Railways and Transportation Engineering Sherif El-Badawy, Jan Valentin, 2018-10-27 This volume brings together scientific experts in different areas that contribute to the railway track and transportation engineering challenges evaluate the state of the art identify the shortcomings and opportunities for research and promote the interaction with the industry In particular scientific topics that are addressed in this volume include railway ballasted track degradation settlement problems and stabilization reinforcement technologies switches and crossings and related derailments causes train induced vibrations and mitigation measures operations management and performance of ground transportation and traffic congestion and safety procedures The volume is based on the best contributions to the 2nd GeoMEast International Congress and Exhibition on Sustainable Civil Infrastructures Egypt 2018 The official international congress of the Soil Structure Interaction Group in Egypt SSIGE *CIGOS 2019, Innovation for Sustainable Infrastructure* Cuong Ha-Minh, Dong Van Dao, Farid Benboudjema, Sybil Derrible, Dat Vu Khoa Huynh, Anh Minh Tang, 2019-10-10 This book presents selected articles from the 5th International Conference on Geotechnics Civil Engineering Works and Structures held in Ha Noi focusing on the theme Innovation for

Sustainable Infrastructure aiming to not only raise awareness of the vital importance of sustainability in infrastructure development but to also highlight the essential roles of innovation and technology in planning and building sustainable infrastructure. It provides an international platform for researchers, practitioners, policymakers and entrepreneurs to present their recent advances and to exchange knowledge and experience on various topics related to the theme of Innovation for Sustainable Infrastructure.

Handbook of Materials Failure Analysis with Case Studies from the Chemicals, Concrete and Power Industries Abdel Salam Hamdy Makhlouf, Mahmood Aliofkhazraei, 2015-09-07. This handbook provides an in-depth examination of materials failure in specific situations, a vital component in both developing and engineering new solutions. This handbook covers analysis of materials failure in the chemical, power and structures arenas where the failure of a single component can result in devastating consequences and costs. Material defects, mechanical failure as a result of improper design, corrosion, surface fracture and other failure mechanisms are described in the context of real-world case studies involving steam generators, boiler tubes, gas turbine blades, welded structures, chemical conversion reactors and more. This book is an indispensable reference for engineers and scientists studying the mechanisms of failure in these fields. It introduces readers to modern analytical techniques in materials failure analysis, combines foundational knowledge with current research on the latest developments and innovations in the field, and includes many compelling case studies of materials failure in chemical processing plants, concrete structures and power generation systems.
