**How the Social Sciences Think about the World's Social** Michael Kuhn, 2016-09-13 At the beginning of the new millennium the social sciences took an epochal turn that revolutionized their theory building As a response to what they called the globalization of the social they found the need to globalize their theorizing as well It is curious that only after two centuries of colonialism and imperialism after two world wars and several economic world crises

did they discover that there is a world beyond the national socials it is even more strange that the social sciences globalize their theorizing by comparing theories about nationally confined socials and by creating all sorts of local theories as if any national social was a secluded social biotope Trying to globalize the social sciences they argue that globalizing social science theorizing means finding a way of theorizing that must above all be liberated from scientism in order to allow a provincialization of thinking Not surprisingly the globalizing social sciences have also rediscovered mythological and moral thinking as a means for a true scientific universalism Michael Kuhn argues that the oddities of the globalizing social sciences are not accidents but a consequence of the nature of how the social sciences theorize about the social
