**Handbook of Genetics** Robert King,2012-12-06 The purpose of the first four volumes of the Handbook of Genetics is to bring together collections of relatively short authoritative essays or annotated compilations of data on topics of significance to geneticists Many of the essays will deal with various aspects of the biology of certain species or species groups selected because they are favorite subjects for genetic investigation in nature or the laboratory Often there will be an encyclopedic amount of information available on such species with new papers appearing daily Most of these will be written for specialists in a jargon that is bewildering to a novice and sometimes even to a veteran geneticist working with evolutionarily distant organisms For such readers what is needed is a written introduction to the morphology life cycle reproductive behavior and culture methods for the species in question What are its particular advantages and disadvantages for genetic study and what have we learned from it Where are the classic papers the key bibliographies and how does one get stocks of wild type or mutant strains Lists giving the symbolism and descriptions for selected mutants that have been retained and are thus available for future studies are provided whenever possible Genetic and cytological maps mitotic karyotypes and haploid DNA values are also included when available Volume 4 deals with

certain vertebrate species that have been studied in considerable detail from the standpoint of genetics or molecular cytogenetics Such data are available for only a relatively few vertebrates      **Advances in Agronomy** ,1976-12-03 **Advances in Agronomy**      **Extinctions in Near Time** Ross D.E. MacPhee,Hans-Dieter Sues,2013-11-09 Near time an interval that spans the last 100 000 years or so of earth history qualifies as a remarkable period for many reasons From an anthropocentric point of view the out standing feature of near time is the fact that the evolution cultural diversification and glob al spread of Homo sapiens have all occurred within it From a wider biological perspective however the hallmark of near time is better conceived of as being one of enduring repeat ed loss The point is important Despite the sense of uniqueness implicit in phrases like the biodiversity crisis meant to convey the notion that the present bout of extinctions is by far the worst endured in recent times substantial losses have occurred throughout near time In the majority of cases these losses occurred when and only when people began to ex pand across areas that had never before experienced their presence Although the explana tion for these correlations in time and space may seem obvious it is one thing to rhetori cally observe that there is a connection between humans and recent extinctions and quite another to demonstrate it scientifically How should this be done Traditionally the study of past extinctions has fallen largely to researchers steeped in such disciplines as paleontology systematics and paleoecology The evaluation of future losses by contrast has lain almost exclusively within the domain of conservation biolo gists Now more than ever there is opportunity for overlap and sharing of information      *Life at the Limits* David A. Wharton,2007-07-23 We are fascinated by the seemingly impossible places in which organisms can live There are frogs that freeze solid worms that dry out and bacteria that survive temperatures over 100 C What seems extreme to us is however not extreme to these organisms In this captivating account the reader is taken on a tour of extreme environments and shown the remarkable abilities of organisms to survive a range of extreme conditions such as high and low temperatures and desiccation This book considers how organisms survive major stresses and what extreme organisms can tell us about the origin of life and the possibilities of extraterrestrial life These organisms have an extreme biology which involves many aspects of their physiology ecology and evolution      **Monthly Bibliography of Medical Reviews** ,1976
