

The background of the book cover is a photograph of a modern ship. The upper portion shows the ship's bridge with a large, curved glass window and a dark blue upper hull. The lower portion shows the ship's white hull and a dark grey deck with various structures and railings. A large white number '2' is positioned on the right side of the cover, partially overlapping the bridge and the red title band.

Applied Mechanics Tony Santiko, Muhammad Sapta Heriyawan, Applied mechanics is the study of forces and motion Applied mechanics consists of statics dynamics and hydrodynamics Statics in mechanics is a science that deals with the analysis and forces working on an object of a system that is stationary static and in balance conditions The force generally includes the force itself and the moment In applied mechanics apart from statics is dynamics Dynamics is a branch of physics that deals with forces and torques and the effects of motion The discussion in dynamics is classical mechanics which deals with Newton's laws of motion especially in particle systems This book presents a variety of materials including quantities and units knowledge of vectors forces and moments of forces dynamics and hydrodynamics This book is very useful in solving physics problems related to forces through the concept of dynamics In addition this book also provides material on applying mathematical equations The purpose of writing this book is to fill in the scarcity of literature and handbooks for training participants Training participants can study the material that will be given in advance so that during lectures it will be easier to understand the explanation given by the lecturer This book is expected to be useful for training participants in the marine engineering study program By understanding the material on applied mechanics it is hoped that the training participants will be able to master the ship machinery technology This field of science studies the motion of an object and the effects of forces in a movement This field of knowledge is also a very important part for engineers The branch of mechanics is divided into two Static Mechanics and Dynamic Mechanics Meanwhile Dynamic Mechanics can be divided into two Kinematics and

Kinetics in marine machinery in addition the training participants are expected to be able to understand the heating system both fuel heating and jacket cooling Main Engine mastering the speed of the ship from the diameter of pitch propeller By understanding this book it is hoped that every training participant can work on the ship safely and comfortably A *Text-book on Applied Mechanics* Andrew Jamieson, 1898 *Ocean Engineering Mechanics* Michael E. McCormick, 2010 This book is based on the author's experiences in engineering practice and in the classroom The introductory topics in wave mechanics and the presentation of such have their foundations in the courses taught at the U S Naval Academy The advanced topics have their origins in the postgraduate courses taught at the Johns Hopkins University *A Manual of Applied Mechanics* William John Macquorn Rankine, 1888 *APPLIED MECHANICS* James Henry Cotterill, 1895 *Practical Mathematics for Marine Engineers, Second Class* David M. Reid, George Terence Holford Flanagan, 197? *Practicum Module Applied Mechanics* Afdolludin Afta Tazani, The Applied Mechanics Practicum is one of the practicums that Engineering Studi Program level 1 cadets must complete This practicum aims to improve skills and apply mechanics knowledge to the maritime world specifically the shipping world in the field of ship engines Another expected capability is the implementation of a safety culture in all practical activities in the laboratory or simulator This module is organized in accordance with the sequence of competencies that must be attained in accordance with the syllabus guidelines for the relevant courses making it easier to study and apply theoretical concepts to practicum This module description includes competencies work safety and module content The limitations of the module content mean that this module still has a lot of flaws so the authors are hoping for criticism and suggestions in the future to help them make this module better Hopefully cadets studying mechanics can benefit from this module
