**Education Networks** Joel Spring, 2012-03-22 Education Networks is a critical analysis of the emerging intersection among the global power elite information and communication technology and schools Joel Spring documents and examines the economic and political interests and forces including elite networks the for profit education industry data managers and professional educators that are pushing the use of ICT for online instruction test preparation and tutoring data management instructional software packages and more and looks closely at the impact this is having on schools students and learning Making a distinction

between mind as socially constructed and brain as a physiological entity Spring draws on recent findings from comparative psychology on the possible effects of ICT on the social construction of the minds of students and school managers and from neuroscience regarding its effect on students brains Throughout the influence of elite networks and powerful interest groups is linked to what is happening to children in classrooms In conclusion Spring offers bold suggestions to change the course of the looming technological triumph of ICT in the brave new world of schooling **Once They Were Angels** Rob

Goldman,2006 *Once They Were Angels* details the baseball team s rich 44 year history through fresh perspectives from the players who defined the franchise Bo Belinsky Jim Fregosi Nolan Ryan Rod Carew Don Baylor Reggie Jackson Jim Abbott and many others The book ends where it begins with Scott Spiezio reliving his dramatic home run in the seventh inning of Game Six of the 2002 World Series Like any great franchise worth remembering *Once They Were Angels* will form an indelible stamp in the hearts and minds of Angels fans both young and old *The Truth about Talent* Jacqueline Davies,Jeremy

Kourdi,2010-08-23 Key themes in the book are 1 The need to reevaluate how people contribute and create value in today s economy it is about knowledge innovation and relationships today rather than executive potential tomorrow 2 Challenging the conventional wisdom that talent refers to a special few rather than the vital many Perhaps we don t have enough because we keep looking in the wrong places and doing the wrong things 3 Conditions facing organizations are tough and competitive and markets are turbulent To withstand this we need to build talented organizations and talented individuals 4

Interdependence between people within and across organizations is critical The way that each individual relies on each other and how talent is realised through social and team ties makes a decisive defining difference 5 Individuals control when and who their potential is shared with The idea that an organization can manage talent and potential is an outdated conceit 6 The nature of work itself matters hugely The extent to which it is stimulating and engaging and how people can make the connection with what they do and the wider difference it makes is vital 7 The way talent is generated is affected by the whole ecology of an organization its sense of purpose rituals the behaviour of its leaders how it hires and how it fires people all influence the way talent is generated
