Arvind Sinha Europe In Transition From Feudalism To Industrialization:

Europe in Transition Arvind Sinha, 2010 The developments in Europe from the late fifteenth century till the end of the eighteenth century represented a crucial phase in the emergence of the modern world Scholars refer to this period as early modern and this expression is often associated with the rise of the modern west The pace of change gained momentum during this period undermining the roots of the feudal society The economic transformation pushed Europe towards capitalism The forces of change could be located in the diverse spheres of human activities although the scale of change varied from one region to another The transformation of local economies into the larger European market economy the geographical discoveries and the new sea routes resulted in the creation of colonial empires based on new forms of exploitation The rise of nation states under absolute rulers replaced the decentralized feudal structure Discoveries in arts and sciences and the religious movements opened up new mental horizons which gave birth to new social attitudes cultural patterns and scientific outlook At the same time the negative trends during this period such as the rise of slave trade new forms of exploitation and a wild craze for witch hunting are also included in the discussion This book adopts an interpretive approach and tries to explain what led to the dislocation of centuries old social order and the emergence of new social classes This volume is required reading for students of Modern European history and culture

Nation and Its Modes of Oppressions in South Asia Sajal Nag, 2022-12-30 This volume examines nationhood as a concept and how it became the basis of political discourse in South Asia It studies the emergence of nationalism in modern states as a powerful omnipotent and omnipresent form of political identity in the nineteenth and twentieth centuries This book examines the idea of a nation as it originated in medieval Europe as an unending process of othering individuals groups and communities to establish its hegemony exclusivity and absolute power within a political discourse It sheds light on how these new political frameworks in the name of nationalism resulted in conflicts and bloodshed It unleashed politics of retribution and facilitated majoritarianism minority persecution and collective authoritarianism which devastated individuals and collectivities Further the author also discusses various prominent ideas and contemporary theories on nationalism alongside pivotal socio cultural factors which have significantly shaped the formation of modern nation states and their politics Topical and nuanced this book will be indispensable to researchers scholars and readers interested in nationalism political science modern history political theory political philosophy political sociology political history post colonial studies and South Asia studies

Coastal Histories Yogesh Sharma, 2010 The subject of maritime and oceanic history comprises a large corpus and includes related thematic engagements such as the history of overseas exploration and expansion naval military history shipping port cities the role of migrations and cross cultural processes This extensive field of enquiry also focuses upon the study of littoral societies or the coastal regions in understanding the influence of the ocean upon these lands The interface between the land and the sea with its several ecological and topographical variations has played an important role in determining human activity the settlement

patterns and material culture in the coastal regions which taken together constitute huge masses of territories in all continents The general pattern of existence and the rhythm of life in all these dissociated regions however had considerable commonality due to the overwhelming impact of the two dominant elements water and land in shaping the destinies of its inhabitants Coastal societies have their own particular notion of identity and ambience which differentiates them from the extensive continental zones It is in this context that coastal territories and their histories constitute an interesting theme of enquiry The present volume examines a number of themes pertaining to different coastal regions of India coastal ecology commercial crops transmission of diseases fortifications port hierarchy new port towns vessels and boats fishing communities social life of women etc It should be of interest to students and scholars of maritime history of India
