## **Descartes Baby Diznet:**

Descartes' Baby Paul Bloom, 2011-06-08 Why is a forgery worth so much less than an original work of art What s so funny about someone slipping on a banana peel Why as Freud once asked is a man willing to kiss a woman passionately but not use her toothbrush And how many times should you baptize a two headed twin Descartes Baby answers such questions questions we may have never thought to ask about such uniquely human traits as art humour faith disgust and morality In this thought provoking and fascinating account of human nature psychologist Paul Bloom contends that we all see the world in terms of bodies and souls Even babies have a rich understanding of both the physical and social worlds They expect objects to obey principles of physics and they re startled when things disappear or defy gravity They can read the emotions of adults and respond with their own feelings of anger sympathy and joy This perspective remains with us throughout our lives Using his own researches and new ideas from philosophy evolutionary biology aesthetics theology and neuroscience Bloom shows how this way to making sense of reality can explain what makes us human The myriad ways that our childhood views of the world undergo development throughout our lives and profoundly influences our thoughts feelings and actions is the subject of this richly rewarding book

*Advances in Religion, Cognitive Science, and Experimental Philosophy* Helen De Cruz, Ryan Nichols, 2016-01-28 Experimental philosophy has blossomed into a variety of philosophical fields including ethics epistemology metaphysics and philosophy of language But there has been very little experimental philosophical research in the domain of philosophy of religion *Advances in Religion Cognitive Science and Experimental Philosophy* demonstrates how cognitive science of religion has the methodological and conceptual resources to become a form of experimental philosophy of religion Addressing a wide variety of empirical claims that are of interest to philosophers and psychologists of religion a team of psychologists and philosophers apply data from the psychology of religion to important problems in the philosophy of religion including the psychology of religious diversity the psychology of substance dualism the problem of evil and the relation between religious belief and empathy and the cognitive science explaining the formation of intuitions that unwittingly guide philosophers of religion when formulating arguments Bringing together authors and researchers who have made important contributions to interdisciplinary research on religion in the last decade *Advances in Religion Cognitive Science and Experimental Philosophy* provides new ways of approaching core philosophical and psychological problems

**The Laughing Baby** Caspar Addyman, 2020-04-16 Few things in life are more delightful than

sharing in the laughter of a baby Until now however psychologists and parenting experts have largely focused on moments of stress and confusion Developmental psychologist Caspar Addyman decided to change that Since 2012 Caspar has run the Baby Laughter project collecting data videos and stories from parents all over the world This has provided a fascinating window into what babies are learning and how they develop cognitively and emotionally Deeper than that he has observed laughter as the purest form of human connection It creates a bond that parents and infants share as they navigate the challenges of childhood Moving chronologically through the first two years of life *The Laughing Baby* explores the origin story for our incredible abilities In the playful daily lives of babies we find the beginnings of art science music and happiness Our infancy is central to what makes us human and understanding why babies laugh is key to understanding ourselves

**Screen Time** Lisa Guernsey, 2012-03-20 As a mother Lisa Guernsey wondered about the influence of television on her two young daughters As a reporter she resolved to find out What she first encountered was tired advice sensationalized research claims and a rather draconian mandate from the American Academy of Pediatrics no TV at all before the age of two But like many parents she wanted straight answers and realistic advice so she kept digging she visited infant perception labs and child development centers around the country She interviewed scores of parents psychologists cognitive scientists and media researchers as well as programming executives at Noggin Disney Nickelodeon Sesame Workshop and PBS Much of what she found flies in the face of conventional wisdom and led her to conclude that new parents will be best served by focusing on the three C s content context and the individual child *Into the Minds of Babes* is a fascinating book that points out how little credible research exists to support the AAP s dire recommendation Parents teachers and psychologists will be relieved to learn positive approaches to using videos with young children and will be empowered to make their own informed choices

**Is Religion Natural?** Dirk Evers, Michael Fuller, Antje Jackelen, Taede Smedes, 2012-06-28 How natural is religion Is it a phenomenon written in our genes or brains naturally developing with the development of the human race The book considers the findings of evolutionary psychology from scientific philosophical and theological perspectives and critically examines the relation between empirical epistemological and theological notions Chapters in the book deal with the naturalness of religion and religious experiences as based on genetics biology and social psychology Other authors examine the relationship between religion science and theology with regard to the naturalness of religion from a more general perspective The last part of the book includes views from a Muslim scholar and a historian

**Uncanny Cinema** Murray Pomerance, 2022-10-20 Murray Pomerance's latest book explores an encyclopedic range of films and television shows to demonstrate the difficulty of conveying the experience of viewing cinema through words and the medium of text From On the Waterfront to Marriage Story *Uncanny Cinema* illuminates that words and writing are in perilous waters when applied to cinema similar to ungestured talk The book begins with this problem using Julian Jaynes's thoughts on vocality and imagination before delving into three exploratory movements arranged to alternately challenge inspire and confound the reader to question if we know what we think we know or even see what we think we see The viewer is faced with disturbances ruptures and surprises that occur during the viewing experience which Pomerance analyzes to stretch the sense of what we do and do not or possibly cannot know particularly as we think talk and write about cinema

*Edinburgh Companion to Children's Literature* Clementine Beauvais, 2017-09-08 This collection takes informed and scholarly readers to the utmost frontier of children's literature criticism from the intricate worlds of children's poetry picturebooks and video games to the new theoretical constellations of critical plant studies non-fiction studies and big data analyses of literature

**Folk Phenomenology** Samuel D. Rocha, 2015-09-28 Folk is an analog foundation in a digital world Phenomenology is a big word about a small impossible task trying to imagine the real This book describes this task in relation to its foundation Most of all Folk Phenomenology is a defense of the integrity and sufficiency of art thinking feeling living dying In short being in love

**Mining Coal and Undermining Gender** Jessica Smith Rolston, 2014-03-31 Though mining is an infamously masculine industry women make up 20 percent of all production crews in Wyoming's Powder River Basin the largest coal producing region in the United States How do these women fit into a working culture supposedly hostile to females This is what anthropologist Jessica Smith Rolston herself a onetime mine worker and the daughter of a miner set out to discover Her answers based on years of participant observation in four mines and extensive interviews with miners managers engineers and the families of mine employees offer a rich and surprising view of the working families that miners construct In this picture gender roles are not nearly as straightforward or as straitened as stereotypes suggest Gender is far from the primary concern of coworkers in crews Far more important Rolston finds is protecting the safety of the entire crew and finding a way to treat each other well despite the stresses of their jobs These miners share the burden of rotating shift work continually switching between twelve hour day and night shifts which deprives them of the daily rhythms of a typical home from morning breakfasts to bedtime stories Rolston identifies the mine workers response to these shared challenges as a new sort of constructed kinship that both challenges and reproduces gender roles in their everyday working and family lives Crews expectations for coworkers to treat one another like family and to adopt an agricultural work ethic tend to minimize gender

differences And yet these differences remain tenacious in the equation of masculinity with technical expertise and of femininity with household responsibilities For Rolston such lingering areas of inequality highlight the importance of structural constraints that flout a common impulse among men and women to neutralize the significance of gender at home and in the workplace At a time when the Appalachian region continues to dominate discussion of mining culture this book provides a very different and unexpected view of how miners live and work together and of how their lives and work reconfigure ideas of gender and kinship

**Die Neue Rundschau** ,2005 Toy Theory Seth Giddings,2024-11-05 A novel interpretation of the history and theory of technology from the perspective of toys play and play objects Toy Theory addresses the relationships between toys and technology in two distinct but overlapping ways first as underexamined cultural artifacts and behaviors with significant technical attributes and second as playful and toylike dimensions of technology at large Seth Giddings sets out a toy theory of technology that emphasizes the speculative experimental and noninstrumental in technological paradigms and argues that children s playthings rather than being the most ephemeral and inconsequential of technical devices instead offer analytical and anthropological resources for understanding the materiality and imaginaries of technology over time After defining toy theory in general and conceptual terms Giddings examines different types of toys to explore shifting relationships between the microcosmic symbolic or mimetic content material and technical constitution and modes of play of toys and toy related artifacts on the one hand and prevailing macrocosmic technological paradigms and imaginaries on the other Taking a broad historical and genealogical view Giddings traces contemporary postdigital toy and play culture to precedents from the neolithic through to the Enlightenment to consumer culture from the early nineteenth century to the present day

**Moving Places** Jonathan Rosenbaum,1995-03-24 I would number Moving Places among a handful of truly classic books about film James Naremore author of *Acting in the Cinema* *Sense and Sensitivity* Philip R. Davies,Alastair G.
