career as a qualitative researcher This book is intended to contribute to the popularisation of qualitative research in Malaysia Qualitative studies in educational research are very limited in many countries and to date there has been very little work done using this form of educational inquiry in Malaysia The dominant tradition has followed the positivist paradigm A qualitative case study offers a different approach and generates a range of information of different qualities from that obtained using traditional approaches This book provides both the theories and practical practices to undertake a qualitative study The conception of this book began from the assumption that our world is interpreted through language as means of communication and understanding Writing narratives of experience is becoming a common way of describing how people make sense of their experience or problems at hand At the root of the naturalistic inquiry exhibited in this book is an interest in understanding the experience of learners and the meanings they make of the distance learning experience at Universiti Utara Malaysia UUM This study was designed as a single case focusing on distance learners of different backgrounds in UUM
