**Agricultural Drawing and the Design of Farm Structures (Classic Reprint)** Thomas E. French, 2017-12-24

Excerpt from Agricultural Drawing and the Design of Farm Structures As the title implies this book is intended primarily for students in agriculture and agricultural engineering Engineering Drawing is a required subject in practically all college agricultural courses It is not given in these courses with the idea of making professional draftsmen but is regarded as an important subject for increasing the efficiency of the farm owner or manager by giving him what is in reality a new language in which to express and record his ideas Aside from mechanics and builders there is no class to whom the value of technical drawing should appeal with as much force as to the progressive farmer His literature is full of illustrations and technical sketches which to be read intelligently require a knowledge of technical drawing Government bulletins State bulletins agricultural periodicals and books even trade and machinery catalogues cannot be fully understood without this knowledge In order to build properly or to pass upon a set of plans he should be able to read architectural drawings The man with the ability to draw to scale can plan his buildings take o his bill of materials estimate the costs and mentally see the finished structure before it is built He can make sketches of broken parts of machinery or of special pieces which he wishes to have made he can make a layout of his buildings or a plat of his farm In short he has an asset of distinct advantage and value This book is a text book rather than a course in drawing The principles and processes involved are described and illustrated and a variety of problems of various kinds and of progressive difficulty have been arranged with outlines for a considerable number of additional ones not only giving suggestions to the farm owner but also supplying class material which may thus be varied from year to year Drawing courses vary in length and the instructor may make his choice from these numerous problems to cover the different divisions of the subject matter included in the text About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

*Concepts of Farm Machinery and Power* Dipankar Mandal, 2016-12-02 In the branch of Agricultural Engineering especially in Farm Machinery and Power sector there is a need for a book exclusively dealing with various concepts and their applications in transparent and clear manner So an effort has been made to prepare this book entitled Concepts of Farm Machinery and Power to meet the demand of students teachers RS The book will be useful immensely to the students preparing for GATE examination in AG papers and also for JRF ARS IFS examinations The chapters of the book deals with conceptual analysis of

farm machineries which are confusing and difficult to understand It is expected that the theoretical as well as numerical analysis of this book will sharpen the ingenious power of the readers and help them to solve problems quickly Moreover many problems are solved in different ways which will help the readers in understanding and applying the concepts properly I am extremely grateful to my teachers Dr Subrata Karmakar Associate Professor Dept of Farm Machinery and Power Bidhan Chandra Krishi Viswavidyalaya Prof Partha Sarathi Chattopadhyaya Professor Dept of Farm Machinery and Power Bidhan Chandra Krishi Viswavidyalaya Er Ravi Reddy Senior Technician CFMTTI Budni M P and my B Tech friends for their encouragement and kind cooperation Sagacious suggestions and discrete criticism are welcome to improve the book further so that it becomes more relevant and more beneficial to the readers in real terms Finally I envisage this attempt as an important step in removing hurdles in the path of popularization of Agricultural Engineering I hope that it will fire imaginations and ability of many Agricultural Engineers in the profession to produce such innovative works in future
