**The Intention Imperative** Mark Sanborn, 2019-10-15 Today s leaders often lack clarity and therefore the ability to execute leaving their organizations mired in the status quo Renowned leadership expert Mark Sanborn demystifies the essential elements of great leadership and provides a formula for leaders to achieve breakthrough success Culture inspiration and emotion these are the three new imperatives of the intentional leader They re the focus of consistent action that a leader must take daily to lead powerfully in the world that is not the world that was While every company will approach these three imperatives differently they re the backbone of a successful company and they re the essential elements of intentional leadership The Intention Imperative explains how five very different businesses use clarity of purpose and consistent action to achieve extraordinary success in their given fields Using their practices as examples Sanborn shows how they ve harnessed the three imperatives and how it s possible to improve your own business by adopting their practices The larger points of intentional leadership intentional leaders and their place in the current world are explained giving

readers the opportunity to spot the parallels in real world examples In addition readers will Discover why motivation isn't enough today and why employees need inspiration to deliver great results Build a culture that powers the right actions and creates the right results Make a shift in thinking to design and deliver positive emotions for customers Learn how other organizations have applied intentional leadership principles and achieved breakthrough results      **Advanced Aircraft**

**Design** Egbert Torenbeek, 2013-07-29 Although the overall appearance of modern airliners has not changed a lot since the introduction of jetliners in the 1950s their safety efficiency and environmental friendliness have improved considerably Main contributors to this have been gas turbine engine technology advanced materials computational aerodynamics advanced structural analysis and on board systems Since aircraft design became a highly multidisciplinary activity the development of multidisciplinary optimization MDO has become a popular new discipline Despite this the application of MDO during the conceptual design phase is not yet widespread Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes presents a quasi analytical optimization approach based on a concise set of sizing equations Objectives are aerodynamic efficiency mission fuel empty weight and maximum takeoff weight Independent design variables studied include design cruise altitude wing area and span and thrust or power loading Principal features of integrated concepts such as the blended wing and body and highly non planar wings are also covered The quasi analytical approach enables designers to compare the results of high fidelity MDO optimization with lower fidelity methods which need far less computational effort Another advantage to this approach is that it can provide answers to what if questions rapidly and with little computational cost Key features Presents a new fundamental vision on conceptual airplane design optimization Provides an overview of advanced technologies for propulsion and reducing aerodynamic drag Offers insight into the derivation of design sensitivity information Emphasizes design based on first principles Considers pros and cons of innovative configurations Reconsiders optimum cruise performance at transonic Mach numbers Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes advances understanding of the initial optimization of civil airplanes and is a must have reference for aerospace engineering students applied researchers aircraft design engineers and analysts      Mechanical Design P.R.N. Childs, 2003-12-04 This book introduces the subject of total design and introduces the design and selection of various common mechanical engineering components and machine elements These provide building blocks with which the engineer can practice his or her art The approach adopted for defining design follows that developed by the SEED Sharing Experience in Engineering Design programme where design is viewed as the total activity necessary to provide a product or process to meet a market need Within this framework the book concentrates on developing detailed mechanical design skills in the areas of bearings shafts gears seals belt and chain drives clutches and brakes springs and fasteners Where standard components are available from manufacturers the steps necessary for their specification and selection are developed The framework used within the text has been to provide descriptive and illustrative information to

introduce principles and individual components and to expose the reader to the detailed methods and calculations necessary to specify and design or select a component To provide the reader with sufficient information to develop the necessary skills to repeat calculations and selection processes detailed examples and worked solutions are supplied throughout the text This book is principally a Year Level 1 and 2 undergraduate text Pre requisite skills include some year one undergraduate mathematics fluid mechanics and heat transfer principles of materials statics and dynamics However as the subjects are introduced in a descriptive and illustrative format and as full worked solutions are provided it is possible for readers without this formal level of education to benefit from this book The text is specifically aimed at automotive and mechanical engineering degree programmes and would be of value for modules in design mechanical engineering design design and manufacture design studies automotive power train and transmission and tribology as well as modules and project work incorporating a design element requiring knowledge about any of the content described The aims and objectives described are achieved by a short introductory chapters on total design mechanical engineering and machine elements followed by ten chapters on machine elements covering bearings shafts gears seals chain and belt drives clutches and brakes springs fasteners and miscellaneous mechanisms Chapters 14 and 15 introduce casings and enclosures and sensors and actuators key features of most forms of mechanical technology The subject of tolerancing from a component to a process level is introduced in Chapter 16 The last chapter serves to present an integrated design using the detailed design aspects covered within the book The design methods where appropriate are developed to national and international standards e g ANSI ASME AGMA BSI DIN ISO The first edition of this text introduced a variety of machine elements as building blocks with which design of mechanical devices can be undertaken The approach adopted of introducing and explaining the aspects of technology by means of text photographs diagrams and step by step procedures has been maintained A number of important machine elements have been included in the new edition fasteners springs sensors and actuators They are included here Chapters on total design the scope of mechanical engineering and machine elements have been completely revised and updated New chapters are included on casings and enclosures and miscellaneous mechanisms and the final chapter has been rewritten to provide an integrated approach Multiple worked examples and completed solutions are included

**Efficiencies of Slowness** Rachel Anderson-Rabel, 2011 This project focuses on the process and performance of three contemporary collective creation groups Goat Island Elevator Repair Service and Nature Theater of Oklahoma I draw processual and aesthetic connections between collective creation methodologies and the consequences of those

methodologies in performance claiming that processes leave footprints that are ultimately visible to audiences though their visibility requires new ways of seeing Taking into account an American genealogy of collective creation I outline the footprints of method through the images of everyday employment instances of untrained bodies enacting danced gesture and the speeds and velocities that characterize the work of these three contemporary groups Through these aesthetics we can locate evidence of methodological principles that constitute a politics In the work of Goat Island Elevator Repair Service and Nature Theater of Oklahoma this politics does not play out through the ideological content of performance but is embedded within collaborative acts of making *Assembly* West Point Association of Graduates (Organization),1992 **Scientific**
