Östergård,2006-02-03 A new starting point and a new method are requisite to insure a complete classi cation of the Steiner triple systems of order 15 This method was furnished and its tedious and di cult execution und taken by Mr Cole F N Cole L D Cummings and H S White 1917 129 The history of classifying combinatorial objects is as old as the history of the objects themselves In the mid 19th century Kirkman Steiner and others became the fathers of modern combinatorics and their work on various objects including what became later known as Steiner triple systems led to several classi cation results Almost a century earlier in 1782 Euler 180 published some results on classifying small Latin squares but for the rst few steps in this direction one should actually go at least as far back as ancient Greece and the proof that there are exactly ve Platonic solids One of the most remarkable achievements in the early pre computer era is the classi cation of the Steiner triple systems of order 15 quoted above An onerous task that today no sensible person would attempt by hand calcu tion Because with the exception of occasional parameters for which com natorial arguments are e ective often to prove nonexistence or uniqueness classi cation in general is about algorithms and computation **Codes and Designs** K. T.
