Research Anthology on Developing Critical Thinking Skills in Students Management Association, Information Resources, 2020-10-02 Learning strategies for critical thinking are a vital part of today's curriculum as students have few additional opportunities to learn these skills outside of school environments. The Research Anthology on Developing Critical Thinking Skills in Students is a vital reference source that helps to shift and advance the debate on how critical thinking should be taught and offers insights into the significance of critical thinking and its effective integration as a cornerstone of the educational system. Highlighting a range of topics such as discourse analysis, skill assessment and measurement, and critical analysis techniques, this multi-volume book is ideally designed for teachers, instructors, instructional designers, curriculum developers, education professionals, administrators, policymakers, researchers, and academicians.

Case Studies in US Trade Negotiation Volume 1 Charan Devereaux, Robert Z. Lawrence, Michael D. Watkins, 2006-09-01 Trade policy has moved from the wings onto center stage. Between 1992 and 2000, US exports rose by 55 percent. By the year 2000, trade summed to 26 percent of US GDP, and the United States imported almost two thirds of its oil and was the world's largest host country for foreign investors. America's interest in a more open and prosperous foreign market is now squarely economic. This volume presents cases on five important trade negotiations, all focused on making the rules or the process of establishing how the trade system would operate. The cases not only explore the changing substance of trade agreements but also delve into the negotiation process. They explore not just the what of trade but the who, how, and why of decision making. By examining some of the most important recent negotiations, the reader can come to understand not just the larger issues surrounding trade but how players seek to exert influence and how the system is evolving on a day-to-day basis. This book presents a coherent description of the facts that will allow for discussion and independent conclusions about policies, politics, and processes.
