Evidence to be a timely comprehensive and compassionate guide to the pharmacological treatment of young patients with mental illness      Optimizing Medical Education With Instructional Technology Demiroz, Erdem, Waldman, Steven D., 2018-11-30 In today's educational settings infusing technology into educational practices is not optional. It is a necessity because of the changing expectations and needs of learners. In a fast-paced environment such as the medical profession, it is critical that future healthcare professionals have access to the most advanced training environments and resources. Optimizing Medical Education With Instructional Technology is an essential reference that reports on technology-supported medical education. It introduces the best practices in 21st-century learning approaches. This book, in addition to looking at medical education through the lens of instructional technologies, features research on topics such as the ethics of online education, mentoring research, and technology in the clinical setting. This book is designed for medical educators, instructional designers, researchers, practitioners, and academicians.      Introduction to Reference Sources in the Health Sciences, Sixth Edition Jeffrey T. Huber, Susan Swogger, 2014-04-22 Prepared in collaboration with the Medical Library Association, this completely updated, revised, and expanded edition lists classic and up-to-the-minute print and electronic resources in the health sciences, helping librarians find the answers that library users seek. Included are electronic versions of traditionally print reference sources, trustworthy electronic-only resources, and resources that library users can access from home or on the go through freely available websites or via library licenses. In this benchmark guide, the authors include new chapters on health information seeking, point-of-care sources, and global health sources. Focus on works that can be considered foundational or essential in both print and electronic formats. Address questions librarians need to consider in developing and maintaining their reference collections. When it comes to questions involving the health sciences, this valuable resource will point both library staff and the users they serve in the right direction.      *School Nursing* Janice Selekman, Robin Adair Shannon, Catherine F. Yonkaitis, 2019-07-01 Produced in cooperation with the National Association of School Nurses, this text includes comprehensive coverage of the multiple facets of school nursing, from the foundations of practice and the roles and functions of a school nurse through episodic and chronic illness and behavioral issues to legal issues and leading and managing within school settings. Written and edited by school nurses and pediatric experts, it features real-world tested best practices based on evidence and experience. There's content here that you won't find in other books such as health assessments, individualized health plan development, mental health conditions including adolescent depression, contemporary legal issues, and current policy statements essential to school nursing.      Elsevier Comprehensive Guide PGME With Companion Website - Volume 3 Exam, 2009
