*Towards a Philosophy of Cinematography* Alexander Nevill, 2021-06-01 This book presents three interrelated essays about cinematography which offer a theoretical understanding of the ways that film practitioners orchestrate light in today s post digital context Cinematography is a practice at the heart of film production which

traditionally involves the control of light and camera technologies to creatively capture moving imagery During recent years the widespread adoption of digital processes in cinematography has received a good deal of critical attention from practitioners and scholars alike however little specific consideration about evolving lighting practices can be found amongst this discourse Drawing on new materialist ideas actor network theory and the concept of co creativity these essays examine the impact of changing production processes for the role and responsibilities of a cinematographer with a specific focus on lighting Each essay advances a new perspective on the discipline moving from the notion of light as vision to light as material from technology as a tool to technology as a network and from cinematography as an industry to cinematography as a collaborative art

Basic Cinematography Kurt Lancaster, 2019-03-07 The cinematographer must translate the ideas and emotions contained in a script into something that can be physically seen and felt onscreen helping the director to fulfil the vision of the film The shots may look good but they will not serve the story until the composition lenses and lighting express enhance and reveal the underlying emotions and subtext of the story By making physical the ideas and emotions of the story the cinematographer supports blocking as a visual form of the story through these tools Rather than delve into technical training Basic Cinematography helps to train the eye and heart of cinematographers as visual storytellers providing them with a strong foundation for their work so that they re ready with creative ideas and choices on set in order to make compelling images that support the story The book includes tools tables and worksheets on how to enhance students and experienced filmmakers with strong visual storytelling possibilities including such features as Dramatic script analysis that will help unlock blocking composition and lighting ideas that reveal the visual story Ten tools of composition Psychological impact of lenses shot sizes and camera movement Six elements of lighting for visual storytelling What to look for beneath the hood of cameras including using camera log RAW and LUTs Dramatic analysis chart and scene composition chart to help plan your shoots Case studies from such visually cinematic shows and documentaries as Netflix s Godless Jessica Jones The Crown and Chef s Table as well as examples from classroom exercises Features insights from the DP of Jessica Jones Manuel Billeter and the DP of Chef s Table Adam Bricker
