singer's personal identity the gendering of choral ensembles social justice in choral education and the role of the choral art in society more generally Included scholarship focuses on both the United States and international perspectives in five sections that address traditional paradigms of the field and challenges to them critical case studies on teaching and conducting specific populations such as international school or barbershop choirs the pedagogical functions of repertoire teaching as a way to construct identity and new scholarly methodologies in pedagogy and the voice

Choral Conducting and the Construction of Meaning Liz Garnett, 2017-07-05 It is a truism in teaching choral conducting that the director should look like s/he wishes the choir to sound The conductor's physical demeanour has a direct effect on how the choir sings at a level that is largely unconscious and involuntary It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery but also different gestural vocabularies which are shared not only between conductors within that tradition but also with the singers It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening But how can these forms of physical communication be explained Do they belong to a pre-cultural realm of primate social bonding or do they rely on the context and conventions of a particular choral culture Is body language an inherent part of musical performance styles or does it come afterwards in response to music At a practical level to what extent can a practitioner from one tradition mandate an approach as good practice and to what extent can another refuse it on the grounds that we don't do it that way This book explores these questions at both theoretical and practical levels It examines textual and ethnographic sources and draws on theories from critical musicology and nonverbal communication studies to analyse them By comparing a variety of choral traditions it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level and in what ways they are constructed within a specific idiom Its findings will be of interest both to those engaged in the study of music as a cultural practice and to practitioners involved in a choral conducting context that increasingly demands fluency in a variety of styles

Transforming Choral Singing Charles W. Beale, 2024-02-02 Choral conductors and clinicians often focus on honing the technical and artistic elements of their choir's performance but what is the true purpose of choral singing Choral performances sound beautiful but they also tell stories say something to someone and create change in them In that fundamental sense they are always activist In Transforming Choral Singing An Activist's Guide for Choir Directors author Charles W Beale draws from his nearly 20 years of leading major choirs in the LGBTQIA choral movement internationally as well as his long experience as a singer organist conductor and educator to put forth a new vision for choral singing to move audiences and change the world Four main principles underpin this vision connection impact social justice and stylistic openness Beale lays down a non-canonical and inclusive framework grounded in critical musicology and pedagogy for mission-driven and activist-oriented engagement with the choral arts and provides practical takeaways for choral practitioners and conductors through a lively mix of practical rigorous and fun workshops tips and

suggestions Starting from the premise that all styles deserve equal space the nine chapters cover the core aspects of choral directing including mission vocal sound rhythm and groove improvising programming conducting and leading a choral community teaching and learning and the daily practice of equity and inclusion The book closes with a series of calls to action and lays out a potentially transformative activist vision for the whole field which foregrounds participation and engagement and conceives of all choral singing as a powerful catalyst for musical and social change The result is a provocative and contemporary approach to building choral communities with profound implications for why we sing what we sing how we sing and how we conduct teach rehearse and lead a choral community **Praxis: Singen mit Kindern und Jugendlichen**
