Disconnected Youth New Media And The Ethics Gap The John D And Catherine T Macarthur Foundation Series On Digital Media And Learning:

Disconnected Carrie James, 2016-09-02 How young people think about the moral and ethical dilemmas they encounter when they share and use online content and participate in online communities Fresh from a party a teen posts a photo on Facebook of a friend drinking a beer A college student repurposes an article from Wikipedia for a paper A group of players in a multiplayer online game routinely cheat new players by selling them worthless virtual accessories for high prices In *Disconnected* Carrie James examines how young people and the adults in their lives think about these sorts of online dilemmas describing ethical blind spots and disconnects Drawing on extensive interviews with young people between the ages of 10 and 25 James describes the nature of their thinking about privacy property and participation online She identifies three ways that young people approach online activities A teen might practice self focused thinking concerned mostly about consequences for herself moral thinking concerned about the consequences for people he knows or ethical thinking concerned about unknown individuals and larger communities James finds among other things that youth are often blind to moral or ethical concerns about privacy that attitudes toward property range from what s theirs is theirs to free for all that hostile speech can be met with a belief that online content is just a joke and that adults who are consulted about such dilemmas often emphasize personal safety issues over online ethics and citizenship Considering ways to address the digital ethics gap James offers a vision of conscientious connectivity which involves ethical thinking skills but perhaps more important is marked by sensitivity to the dilemmas posed by online life a motivation to wrestle with them and a sense of moral agency that supports socially positive online actions [The Oxford Handbook of Digital Technology and Society](#)

Simeon Yates, Ronald E. Rice, 2020-06-01 Required reading for anyone interested in the profound relationship between digital technology and society Digital technology has become an undeniable facet of our social lives defining our governments communities and personal identities Yet with these technologies in ongoing evolution it is difficult to gauge the full extent of their societal impact leaving researchers and policy makers with the challenge of staying up to date on a field that is constantly in flux *The Oxford Handbook of Digital Technology and Society* provides students researchers and practitioners across the technology and social science sectors with a comprehensive overview of the foundations for understanding the various relationships between digital technology and society Combining robust computer aided reviews of current literature from the UK Economic and Social Research Council s commissioned project *Ways of Being in a Digital Age* with newly commissioned chapters this handbook illustrates the upcoming research questions and challenges facing the social sciences as they address the societal impacts of digital media and technologies across seven broad categories citizenship and politics communities and identities communication and relationships health and well being economy and sustainability data and representation and governance and security Individual chapters feature important practical and ethical explorations into

topics such as technology and the aging digital literacies work home boundary machines in the workforce digital censorship and surveillance big data governance and regulation and technology in the public sector The Oxford Handbook of Digital Technology and Society will equip readers with the necessary starting points and provocations in the field so that scholars and policy makers can effectively assess future research practice and policy

Young People's Civic Identity in the Digital Age Julianne K. Viola, 2020-03-10 This book explores young people's civic experiences in contemporary American society and how they navigate the political world in an era defined by digital media Drawing on the experiences of young people before they have reached voting age the book provides vital perspectives on citizenship and civic engagement of a part of the population that is often overlooked The author engages with the tensions young people encounter in their everyday personal and civic lives particularly in their understanding and experience of civic identity in ways that are shaped by society's misperceptions of youth The book introduces a new framework of civic identity that has been directly informed by the lived civic experiences of young people themselves The findings will be of great interest to researchers and students working in political science sociology youth studies education studies and media studies as well as policy makers practitioners and parents of young people

When Rape Goes Viral Anna Gjika, 2023-12-05 Stories of teen sexting scandals cyberbullying and image based sexual abuse have become commonplace fixtures of the digital age with many adults struggling to identify ways to monitor young people's digital engagement In *When Rape Goes Viral* Anna Gjika argues that

rather than focusing on surveillance we should examine such incidents for what they tell us about youth peer cultures and the gender norms and sexual ethics governing their interactions Drawing from interviews with teens and high profile cases of mediated juvenile sexual assault Gjika exposes the deeply unequal and heteronormative power dynamics informing teens intimate relationships and online practices and she critically interrogates the role of digital cultures and broader social values in sanctioning abuse The book also explores the consequences of social media and digital evidence for young victim survivors and perpetrators of sexual assault detailing the paradoxical capacities of technology for social and legal responses to gender based violence **Resonant Games** Eric Klopfer,Jason Haas,Scot Osterweil,Louisa Rosenheck,2025-05-13

Principles for designing educational games that integrate content and play and create learning experiences connecting to many areas of learners lives Too often educational videogames are narrowly focused on specific learning outcomes dictated by school curricula and fail to engage young learners This book suggests another approach offering a guide to designing games that integrates content and play and creates learning experiences that connect to many areas of learners lives These games are not gamified workbooks but are embedded in a long form experience of exploration discovery and collaboration that takes into consideration the learning environment Resonant Games describes twenty essential principles for designing games that offer this kind of deeper learning experience presenting them in connection with five games or collections of games developed at MIT s educational game research lab the Education Arcade Each of the games which range from Vanished an alternate reality game for middle schoolers promoting STEM careers to Ubiquitous Bio a series of casual mobile games for high school biology students has a different story but all spring from these fundamental assumptions honor the whole learner as a full human being not an empty vessel awaiting a fill up honor the sociality of learning and play honor a deep connection between the content and the game and honor the learning context most often the public school classroom but also beyond the classroom The open access edition of this book was made possible by generous funding from the MIT Libraries and Klopfer s lab Connected Gaming Yasmin B. Kafai,Quinn Burke,2024-03-19

How making and sharing video games offer educational benefits for coding collaboration and creativity Over the last decade video games designed to teach academic content have multiplied Students can learn about Newtonian physics from a game or prep for entry into the army An emphasis on the instructionist approach to gaming however has overshadowed the constructionist approach in which students learn by designing their own games themselves In this book Yasmin Kafai and Quinn Burke discuss the educational benefits of constructionist gaming coding collaboration and creativity and the move from computational thinking toward computational participation Kafai and Burke point to recent developments that support a shift to game making from game playing including the game industry s acceptance and even promotion of modding and the growth of a DIY culture Kafai and Burke show that student designed games teach not only such technical skills as programming but also academic subjects Making games also teaches collaboration as students frequently work in teams to produce content and then share their

games with in class or with others online Yet Kafai and Burke don t advocate abandoning instructionist for constructionist approaches Rather they argue for a more comprehensive inclusive idea of connected gaming in which both making and gaming play a part

Hanging Out, Messing Around, and Geeking Out, Tenth Anniversary Edition Mizuko Ito, Sonja Baumer, Matteo Bittanti, Danah Boyd, Rachel Cody, 2019-09-24 The tenth anniversary edition of a foundational text in digital media and learning examining new media practices that range from podcasting to online romantic breakups Hanging Out Messing Around and Geeking Out first published in 2009 has become a foundational text in the field of digital media and learning Reporting on an ambitious three year ethnographic investigation into how young people live and learn with new media in varied settings at home in after school programs and in online spaces it presents a flexible and useful framework for understanding the ways that young people engage with and through online platforms hanging out messing around and geeking out otherwise known as HOMAGO Integrating twenty three case studies which include Harry Potter podcasting video game playing music sharing and online romantic breakups in a unique collaborative authorship style Hanging Out Messing Around and Geeking Out combines in depth descriptions of specific group dynamics with conceptual analysis Since its original publication digital learning labs in libraries and museums around the country have been designed around the HOMAGO mode and educators have created HOMAGO guidebooks and toolkits This tenth anniversary edition features a new introduction by Mizuko Ito and Heather Horst that discusses how digital youth culture evolved in the intervening decade and looks at how HOMAGO has been put into practice This book was written as a collaborative effort by members of the Digital Youth Project a three year research effort funded by the John D and Catherine T MacArthur Foundation and conducted at the University of California Berkeley and the University of Southern California

Families at Play Sinem Siyahhan, Elisabeth Gee, 2024-07-02 How family video game play promotes intergenerational communication connection and learning Video games have a bad reputation in the mainstream media They are blamed for encouraging social isolation promoting violence and creating tensions between parents and children In this book Sinem Siyahhan and Elisabeth Gee offer another view They show that video games can be a tool for connection not isolation creating opportunities for families to communicate and learn together Like smartphones Skype and social media games help families stay connected Siyahhan and Gee offer examples One family treats video game playing as a regular and valued activity and bonds over Halo A father tries to pass on his enthusiasm for Star Wars by playing Lego Star Wars with his young son Families express their feelings and share their experiences and understanding of the world through playing video games like The Sims Civilization and Minecraft Some video games are designed specifically to support family conversations around such real world issues and sensitive topics as bullying and peer pressure Siyahhan and Gee draw on a decade of research to look at how learning and teaching take place when families play video games together With video games they argue the parents are not necessarily the teachers and experts all family members can be both teachers and learners They suggest video games can help families form develop and

sustain their learning culture as well as develop skills that are valued in the twenty first century workplace Educators and game designers should take note *Worried About the Wrong Things* Jacqueline Ryan Vickery, 2018-09-11 Why media panics about online dangers overlook another urgent concern creating equitable online opportunities for marginalized youth It s a familiar narrative in both real life and fiction from news reports to television storylines a young person is bullied online or targeted by an online predator or exposed to sexually explicit content The consequences are bleak the young person is shunned suicidal psychologically ruined In this book Jacqueline Ryan Vickery argues that there are other urgent concerns about young people s online experiences besides porn predators and peers We need to turn our attention to inequitable opportunities for participation in a digital culture Technical and material obstacles prevent low income and other marginalized young people from the positive community building and creative experiences that are possible online Vickery explains that cautionary tales about online risk have shaped the way we think about technology and youth She analyzes the discourses of risk in popular culture journalism and policy and finds that harm driven expectations based on a privileged perception of risk enact control over technology Opportunity driven expectations on the other hand based on evidence and lived experience produce discourses that acknowledge the practices and agency of young people rather than seeing them as passive victims who need to be protected Vickery first addresses how the discourses of risk regulate and control technology then turns to the online practices of youth at a low income minority majority Texas high school She considers the participation gap and the need for schools to teach digital literacies privacy and different online learning ecologies Finally she shows that opportunity driven expectations can guide young people s online experiences in ways that balance protection and agency Framing Internet Safety Nathan W. Fisk, 2016-12-09 An examination of youth Internet safety as a technology of governance seen in panics over online pornography predators bullying and reputation management Since the beginning of the Internet era it has become almost impossible to discuss youth and technology without mentioning online danger pornography that is just a click away lurking sexual predators and inescapable cyberbullies In this book Nathan Fisk takes an innovative approach to the subject examining youth Internet safety as a technology of governance for information technologies and by extension for the forms of sociality and society they make possible He argues that it is through the mobilization of various discourses of online risk that the everyday lives of youth are increasingly monitored and policed and the governing potentials of information technologies are explored Fisk relates particular panics over youth Internet safety to patterns of technological adoption by young people focusing on the policy response at the federal level aimed at producing future cybercitizens He describes pedagogies of surveillance which position parents as agents of surveillance the evolution of the youth Internet safety curricula as seen through materials on cyberbullying and online reputation management and drawing on survey results and focus groups parent and child everyday practice Finally Fisk offers recommendations for a cybersafety of everyday life connecting youth Internet safety to trends in national infrastructure protection and corporate

information assurance **Born Digital** John Palfrey, Urs Gasser, 2016-07-12 An excellent primer on what it means to live digitally It should be required reading for adults trying to understand the next generation Nicholas Negroponte author of Being Digital The first generation of children who were born into and raised in the digital world are coming of age and reshaping the world in their image Our economy our politics our culture and even the shape of our family life are being transformed But who are these wired young people And what is the world they re creating going to look like In this revised and updated edition leading Internet and technology experts John Palfrey and Urs Gasser offer a cutting edge sociological portrait of these young people who can seem even to those merely a generation older both extraordinarily sophisticated and strangely narrow Exploring a broad range of issues privacy concerns the psychological effects of information overload and larger ethical issues raised by the fact that young people s social interactions friendships and civic activities are now mediated by digital technologies Born Digital is essential reading for parents teachers and the myriad of confused adults who want to understand the digital present and shape the digital future **Giving Voice** Meryl Alper, 2017-01-20 How communication technologies meant to empower people with speech disorders to give voice to the voiceless are still subject to disempowering structural inequalities Mobile technologies are often hailed as a way to give voice to the voiceless Behind the praise though are beliefs about technology as a gateway to opportunity and voice as a metaphor for agency and self representation In Giving Voice Meryl Alper explores these assumptions by looking closely at one such case the use of the Apple iPad and mobile app Proloquo2Go which converts icons and text into synthetic speech by children with disabilities including autism and cerebral palsy and their families She finds that despite claims to empowerment the hardware and software are still subject to disempowering structural inequalities Views of technology as a great equalizer she illustrates rarely account for all the ways that culture law policy and even technology itself can reinforce disparity particularly for those with disabilities Alper explores among other things alternative understandings of voice the surprising sociotechnical importance of the iPad case and convergences and divergences in the lives of parents across class She shows that working class and low income parents understand the app and other communication technologies differently from upper and middle class parents and that the institutional ecosystem reflects a bias toward those more privileged Handing someone a talking tablet computer does not in itself give that person a voice Alper finds that the ability to mobilize social economic and cultural capital shapes the extent to which individuals can not only speak but be heard **Good Reception** Antero Garcia, 2022-06-07 A year in the life of a ninth grade English class shows how participatory culture and mobile devices can transform learning in schools Schools and school districts have one approach to innovation buy more technology In Good Reception Antero Garcia describes what happens when educators build on the ways students already use technology outside of school to help them learn in the classroom As a teacher in a public high school in South Central Los Angeles Garcia watched his students nearly universal adoption of mobile devices Whether recent immigrants from Central America or teens

who had spent their entire lives in Los Angeles the majority of his students relied on mobile devices to connect with family and friends and to keep up with complex social networks Garcia determined to discover how these devices and student predilection for gameplay combined with an evolving culture of participation could be used in the classroom Garcia charts a year in the life of his ninth grade English class first surveying mobile media use on campus and then documenting a year long experiment in creating a wireless critical pedagogy by incorporating mobile media and games in classroom work He describes the design and implementation of Ask Anansi an alternate reality game that allows students to conduct inquiry based research around questions that interest them including Why is the food at South Central High School so bad Garcia cautions that the transformative effect on education depends not on the glorification of devices but on teacher support and a trusting teacher student relationship
