Promoting Access to Medical Technologies and Innovation - Intersections between Public Health, Intellectual Property and Trade. World Intellectual Property Organization, World Health Organisation (WHO), World Trade Organisation (WTO), 2020-07-28 This study seeks to reinforce the understanding of the interplay between the distinct policy domains of health trade and intellectual property and of how they affect medical innovation and access to medical technologies The second edition comprehensively reviews new developments in key areas since the initial launch of the study in 2013

Development and Implementation of Health Technology Assessment Valentina Beretta, 2021-03-27 This book analyses the factors that influence the development and implementation of Health Technology Assessment HTA from multiple perspectives It investigates the development of HTA activities in decentralized countries with a specific focus on the analysis of healthcare professionals' perceptions Although these perceptions are highly relevant in terms of implementing HTA processes especially at the local level they are rarely captured and require further investigation which this book provides In particular HTA has been introduced as a support tool for reviewing and assessing the introduction and dissemination of healthcare technologies The book discusses how individual and organisational factors affect knowledge production and translation and their relevance in the context of HTA Furthermore it explores how HTA could be more successfully implemented in decentralized healthcare systems

Case Studies in Innovative Clinical Trials Kristine Broglio, Binbing Yu, 2023-11-27 Drug development is a strictly regulated area As such marketing approval of a new drug depends heavily if not exclusively on evidence generated from clinical trials Drug development has seen tremendous innovation in science and technology that has revolutionized the treatment of some diseases And yet the statistical design and practical conduct of the clinical trials used to test new therapeutics for safety and efficacy have changed very little over the decades Our approach to clinical trials is steeped in convention and tradition The large fixed randomized controlled trial methods that have been the gold standard are well understood and expected by many trial stakeholders However this approach is not well suited to all aspects of modern drug development and the current competitive landscape We now see new therapies that target a small fraction of the patient population rare diseases with high unmet medical needs and pediatric populations that must wait for years for new drug approvals from the time that therapies are approved in adults Large randomized clinical trials are at best inefficient and at worst completely infeasible in many modern clinical settings Advances in technology and data infrastructure call for innovations in clinical trial design Despite advances in statistical methods the availability of information and computing power the actual experience with innovative design in clinical trials across industry and academia is limited This book will be an important showcase of the potential for these innovative designs in modern drug development and will be an important resource to guide those who wish to undertake them for themselves This book is ideal for

professionals in the pharmaceutical industry and regulatory agencies but it will also be useful to academic researchers faculty members and graduate students in statistics biostatistics public health and epidemiology due to its focus on innovation Key Features Is written by pharmaceutical industry experts academic researchers and regulatory reviewers this is the first book providing a comprehensive set of case studies related to statistical methodology implementation regulatory considerations and communication of complex innovative trial design Has a broad appeal to a multitude of readers across academia industry and regulatory agencies Each contribution is a practical case study that can speak to the benefits of an innovative approach but also balance that with the real life challenges encountered A complete understanding of what is actually being done in modern clinical trials will broaden the reader s capabilities and provide examples to first mimic and then customize and expand upon when exploring these ideas on their own

Patient Involvement in Health Technology Assessment Karen M. Facey, Helle Ploug Hansen, Ann N.V. Single, 2017-05-15 This is the first book to offer a comprehensive guide to involving patients in health technology assessment HTA Defining patient involvement as patient participation in the HTA process and research into patient aspects this book includes detailed explanations of approaches to participation and research as well as case studies Patient Involvement in HTA enables researchers postgraduate students HTA professionals and experts in the HTA community to study these complementary ways of taking account of patients knowledge experiences needs and preferences Part I includes chapters discussing the ethical rationale terminology patient based evidence participation and patient input Part II sets out methodology including Qualitative Evidence Synthesis Discrete Choice Experiments Analytical Hierarchy Processes Ethnographic Fieldwork Deliberative Methods Social Media Analysis Patient Reported Outcome Measures patients as collaborative research partners and evaluation Part III contains 15 case studies setting out current activities by HTA bodies on five continents health technology developers and patient organisations Each part includes discussion chapters from leading experts in patient involvement A final chapter reflects on the need to clearly define the goals for patient involvement within the context of the HTA to identify the optimal approach With cohesive contributions from more than 80 authors from a variety of disciplines around the globe it is hoped this book will serve as a catalyst for collaboration to further develop patient involvement to improve HTA If you re not involving patients you re not doing HTA Dr Brian O Rourke President and CEO of CADTH Chair of INAHTA

Enabling and Safeguarding

Personalized Medicine Federica Casarosa, Francesca Gennari, Arianna Rossi, 2025-08-28 This open access volume provides a comprehensive guide to the most pressing challenges arising from the technologies that enable personalized medicine It brings together theoretical empirical and case study based contributions that span across disciplinary boundaries to examine related problems and propose solutions critically Personalized medicine is the next frontier in scientific public health and commercial advancements By recognizing the uniqueness of each human body data driven treatments and digital robotic devices are being increasingly developed to enable patients and medical personnel to benefit from highly accurate and

personalized diagnoses and therapies Healthcare customization is based on predictive preventive personalized and participatory elements each of which requires an interplay between healthcare systems medical personnel patients as well as bioengineers economists regulators lawyers and business owners If the goal of more proactive patient inclusion is to enhance the efficacy of personalized medical interventions it is also paramount to evaluate whether the adoption of customized solutions is sustainable from both economic and organizational perspectives Legal norms provide the framework in which the development of new medical devices the sharing of data for the public good and the provision of healthcare may occur This area of research and practice is regulated by a complex mix of norms concerning personal and non personal data AI governance cybersecurity health law and liability regimes In ever evolving domains where some regulations still need to be defined approved or implemented researchers and practitioners need guidance to enable the safe by design development of medical technologies The book is organized in three sections I Facilitating and Protecting Personalized Medicine which revolves around the mechanisms that enable the sharing and reuse of health data within the Common European Data Spaces seeks to address the cybersecurity challenges posed by medical technologies and critically discusses the definition of scientific research in recent legislative efforts II Scoping Challenges Through the Players in the Personalized Medicine Ecosystem which gathers varied interdisciplinary insights from scholars and practitioners in the fields of medicine economics engineering education and compliance and III Challenges of Personalized Medicine for Liability which focuses on the challenges that personalized data driven medicine poses for traditional and novel liability regimes

m_Health Current and Future Applications Giuseppe Andreoni, Paolo Perego, Enrico Frumento, 2019-02-25 This book describes current trends in m_Health technology systems and applications The book proposes a multifaceted view on m_Health opportunities and requirements starting from four aspects patient technology design and innovation The analysis is completed by a market segmentation overview and by the most recent research experiences to offer a complete benchmark and vision of m_Health for today and tomorrow The contributions are based on the outcomes of initiatives on the future of healthcare funded by the EU in the frame of FP7 and Horizon 2020 and their deployment into real clinical practice Throughout the book clinicians technicians researchers and end users debate their experience needs risks opportunities and available solutions in this fast moving field

Umbrella Reviews Giuseppe Biondi-Zoccai, 2016-02-03 This book is an ideal guide to umbrella reviews overviews of reviews and meta epidemiologic studies for evidence synthesis Research is conducted at different levels primary research consists of original studies while secondary research comprises qualitative reviews systematic reviews and meta analyses Recently a novel further level of research has been introduced based on the analysis and pooling of reviews and meta analysis This book is the first to focus solely on this new type of research design which permits a comprehensive and powerful synthesis of scientific evidence in medicine as well as in many other fields in order to inform decision making All aspects are covered including review design and registration the searching abstracting appraisal and synthesis of evidence

the appraisal of moderators and confounders and state of the art reporting Case studies in a range of medical specialties are then presented The hands on approach of the book written by a multinational team of experts will enable the reader to interpret and independently conduct umbrella reviews
