By presenting methodologically informed ways of researching enriched by real life accounts from academics doing empirical research, the volume seeks to forge a new collaborative path that builds a critical ethic and modes of inquiry within International Political Economy. Substantive chapters advance the pluralism of the critical school of cultural political economy and seek to articulate its nascent research ethic. Short autobiographical vignettes articulate the professional journeys of contributors who do critical political economy. There is practical advice on how to develop evidence from an iterative reflexive research strategy. Using this innovative format, offers a guide to methods in critical political economy by engaging directly with the people doing research, not only as technical practice but also as lived experience. The combination of research and practice presented throughout the book offers an extensive and authoritative framework for evaluating how methods are part of critical research and will be essential reading for all students and scholars of IPE. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1982 Current Catalog National Library of Medicine (U.S.), 1985 First multi year cumulation covers six years 1965-70 Research in Information Studies W.
