## **Mind Numbers Science Flunked Algebra:**

*A Mind For Numbers* Barbara Oakley, PhD, 2014-07-31 The companion book to COURSERA's wildly popular massive open online course Learning How to Learn Whether you are a student struggling to fulfill a math or science requirement or you are embarking on a career change that requires a new skill set *A Mind for Numbers* offers the tools you need to get a better grasp of that intimidating material Engineering professor Barbara Oakley knows firsthand how it feels to struggle with math She flunked her way through high school math and science courses before enlisting in the army immediately after graduation When she saw how her lack of mathematical and technical savvy severely limited her options both to rise in the military and to explore other careers she returned to school with a newfound determination to retool her brain to master the very subjects that had given her so much trouble throughout her entire life In *A Mind for Numbers* Dr Oakley lets us in on the secrets to learning effectively secrets that even dedicated and successful students wish they'd known earlier Contrary to popular belief math requires creative as well as analytical thinking Most people think that there's only one way to do a problem when in actuality there are often a number of different solutions you just need the creativity to see them For example there are more than three hundred different known proofs of the Pythagorean Theorem In short studying a problem in a laser focused way until you reach a solution is not an effective way to learn Rather it involves taking the time to step away from a problem and allow the more relaxed and creative part of the brain to take over The learning strategies in this book apply not only to math and science but to any subject in which we struggle We all have what it takes to excel in areas that don't seem to come naturally to us at first and learning them does not have to be as painful as we might think

*Summary of Barbara Oakley's A Mind for Numbers by Milkyway Media* Milkyway Media, 2019-07-23 *A Mind for Numbers How to Excel at Math and Science Even If You Flunked Algebra* 2014 by Barbara Oakley is a collection of learning strategies for students of all ages Too many people falsely believe that they're naturally deficient in math and science when the real problem is their approach not their abilities Purchase this in depth summary to learn more **Rapid Skill Acquisition** Dr. Adrian Wolfe, 2025-04-16 Unlock the power of accelerated learning and master any skill faster than you ever thought possible Do you feel like you're falling behind or struggling to keep up with the pace of change Whether it's learning a new language mastering a software program or picking up a high income skill the ability to learn quickly is the new superpower In *Rapid Skill Acquisition* Dr Adrian Wolfe breaks down the science of fast efficient learning into a simple actionable blueprint you can apply immediately Inside this book you'll discover The core principles of rapid skill acquisition used by elite performers How to apply the 80/20 Rule to cut your learning curve in half Proven techniques to retain more information with less effort How to avoid overwhelm overcome plateaus and stay motivated The 4 step method to practice smarter not harder The biggest myths about learning and what actually works Whether you're a student entrepreneur professional or lifelong learner this book equips you with the mindset and tools to absorb knowledge faster retain it longer and perform at your peak You don't
