**Recovering the Soul** G. Stephen Blakemore, 2023-01-19 Recovering the Soul explores an area of historical philosophy that few if any others have attempted by critically comparing the metaphysical doctrines of Thomas Aquinas and Baruch Spinoza on the identity of mind and body The central premise is that the hylomorphism of Aquinas s understanding of soul and body has a surprising affinity with Spinoza s own understanding of how human beings are enabled to exist as a single entity that is both mind and body In the process of making the case that hylomorphism can apply to Spinoza s philosophy as much as Aquinas s the book carefully exegetes the work of each philosopher and indicates how each is internally consistent within his own system of thought The hylomorphic reading of Spinoza helps to address some interpretive challenges that his commentators have noted and struggled to harmonize with other aspects of this monist ontology Beyond the historical and interpretive interests the book addresses it also makes the case that hylomorphism as a metaphysical theory of human constitution best harmonizes with contemporary studies in the human genome and provides a more comprehensive starting point for the philosophy of mind than reductionism or substance dualism

*The Medicalized Body and Anesthetic Culture* Brent Dean Robbins, 2018-04-03 This book examines how modern medicine s mechanistic conception of the body has become a defense mechanism to cope with death anxiety Robbins draws from research on the phenomenology of the body the history of cadaver dissection and empirical research in terror management theory to highlight how medical culture operates as an agent which promotes anesthetic consciousness as a habit of perception In short modern medicine s comportment toward the cadaver promotes the suppression of the memory of the person who donated their body This suppression of the memorial body comes at the price of concealing the lived experiential body of patients in medical practice Robbins argues that this style of coping has influenced Western culture and has helped to foster

maladaptive patterns of perception associated with experiential avoidance diminished empathy death denial and the dysregulation of emotion      Reading Philosophy Samuel Guttenplan,Jennifer Hornsby,Christopher Janaway,John Schwenkler,2021-03-03 A key introductory philosophy textbook making use of an innovative interactive technique for reading philosophical texts Reading Philosophy Selected Texts with a Method for Beginners Second Edition provides a unique approach to reading philosophy requiring students to engage with material as they read It contains carefully selected texts commentaries on those texts and questions for the reader to think about as they read It serves as starting points for both classroom discussion and independent study The texts cover a wide range of topics drawn from diverse areas of philosophical investigation ranging over ethics metaphysics epistemology philosophy of mind aesthetics and political philosophy This edition has been updated and expanded New chapters discuss the moral significance of friendship and love the subjective nature of consciousness and the ways that science might explore conscious experience And there are new texts and commentary in chapters on doubt self and moral dilemmas Guides readers through the experience of active engaged philosophical reading Presents significant texts contextualized for newcomers to philosophy Includes writings by philosophers from antiquity to the late 20th century Contains commentary that provides the context and background necessary for discussion and argument Prompts readers to think through specific questions and to reach their own conclusions This book is an ideal resource for beginning students in philosophy as well as for anyone wishing to engage with the subject on their own      **Faith Physics** Nathan V. Hoffman,2021-03-15 FFaith Physics is a new Theory of Everything ToE combining ancient spiritual wisdom and modern quantum physics findings to deliver a belief system that is both intellectually sound and spiritually satisfying It maintains an ineffable Supreme Consciousness is the catalyst of all material creation as a great thought through pure white light in zero point morphogenetic quantum fields Faith Physics claims that consciousness is the cornerstone of base reality existing in a timeless state of now By using the natural cause and effect laws of classical physics the uncertainty principle of quantum mechanics and dark matter energy Faith Physics posits pure consciousness manifests physical creation in a remarkable myriad of forms In the wave particle duality paradigm revealed by quantum mechanics conscious observation transforms light energy into particulate physical matter as condensed or frozen light in accordance with Albert Einstein s famous  $E=mc^2$  equation Faith Physics teaches us we exist and thrive in a unified participatory universe emanating from an eternal Supreme Consciousness source and we are not just a product of random chance evolution In the 21st century religion and science are reaching an enlightened consensus that pure metaphysical consciousness is perpetually painting a picture on the space time continuum canvas depicting a miraculous cycle of physical creation entropy and cosmic rebirth      World Religions and Cults Volume 3 Bodie Hodge,Roger Patterson,2016-11-30 This final book in the series focuses on the atheistic or humanistic type of religions It would be one of the most valuable for the church in the Western World where anti god and pro evolution religions are beginning to explode for it was written to refute

those religions and show how they fail Unlike most books on world religions this title dives into the secular humanistic religions The book starts with God s Word as the absolute authority In doing so God becomes our guide to refute false religions Humanistic religions are all around us and we need to be able to spot their tenets and oppose them instead of allowing them to subtly infiltrate our Christianity and undermine us from within We need to know how to refute these humanistic religions We need to know how to effectively present the gospel to people who have been deceived by humanistic religions

*The Time Warp* Nat Steer, 2022-07-06 Consciousness is power whilst war and violence are the pedigree of the small minded With consciousness the depth of space can be contemplated and man can venture beyond his simplistic spatial concepts Understanding consciousness can recreate not only our brainwaves but also our ability to perceive God With a higher understanding of God and omniscience then mankind can conceive of new galaxies parallel universes and their matrix We can time warp

**The Politics of Environmental Education Centres** Anne Marie Ross, 2025-05-02 This book juxtaposes a representation of environmental education centres around the globe with centres within the New South Wales Department of Education in Australia As terminology shifted from nature study and conservation education to environmental education then environmental and sustainability education within

sustainable development the centres embodied and encompassed this evolution The book traces the centres journeys through the phenomenon of the 1970s growth in socially conscious governance to 1980s 1990s public managerialism to the tightening tentacles of capitalism The complexity of education as a socio political endeavour is made explicit Themes including the changing dynamics of caring for the environment and bureaucratic and political manoeuvring in addition to the effects of activism and globalisation are viewed through a centre lens as the centres survive and thrive in ever increasing neoliberal times The book will appeal to teachers academics and bureaucrats interested in the history and politics of environmental education

**The Human Being, the World and God** Anne L.C. Runehov,2016-09-26

This book offers a philosophical analysis of what it is to be a human being in all her aspects It analyses what is meant by the self and the I and how this feeling of a self or an I is connected to the brain It studies specific cases of brain disorders based on the idea that in order to understand the common one has to study the specific The book shows how the self is thought of as a three fold emergent self comprising a relationship between an objective neural segment a subjective neural segment and a subjective transcendent segment It explains that the self in the world tackles philosophical problems such as the problem of free will the problem of evil the problem of human uniqueness and empathy It demonstrates how the problem of time also has its place here For many people the world includes ultimate reality hence the book provides an analysis and evaluation of different relationships between human beings and Ultimate Reality God The book presents an answer to the philosophical problem of how one could understand divine action in the world

Speaking Management Stephen Keith

McGrath,2022-01-05 This book identifies ten linguistic traps in our everyday language usage and provides philosophical justification for a method of determining internally consistent definitions of groups of related terms that avoid all ten traps Various examples and applications of this method are given throughout The book demonstrates how the seemingly straightforward matter of our understandings of the meaning of words can have major implications for the exercise of power This book illustrates how this insight originated from management research into project governance that found lack of agreement on the definition of that term as well as on many other important management terms To resolve this the impacts of evolution philosophy and linguistics upon our everyday language usage were investigated The research documented in this book found that the human tool called language works well for describing physical objects but has difficulty producing a common understanding of the meaning of concepts a problem not restricted to the management field That field is simply a microcosm that exposes a much more widespread linguistic usage problem affecting our personal religious and political lives one that existed at the time of Plato and Aristotle and has laid hidden for millennia This book includes a lexicon of 70 commonly used but confused or contested management terms as well as a further 18 such project management terms all developed by applying its definitional method The terms include governance power ethics leadership and their associated groups of terms The book explores how disagreement can be resolved using these new clear definitions and extends this into an analysis of who good ethics are good for It also incorporates a section on how to speak management and actually know what you are talking about written in the style of an idiots guide or guide for dummies This identifies common everyday

circumstances in which lack of agreed definitions cause avoidable confusion and provides the book's focus on conflict dissolution rather than on conflict resolution     Reinventing Knowledge: From Alexandria to the Internet Ian F.
