Desert Fire:

Desert Fire Shannon Van Roekel, 2009 A straight from the headlines novel revealing God's love in the midst of horrific conflict and personal turmoil *The McCall Trilogy* Marcia Lynn McClure, 2012-02 The founding desert fire She opened her eyes and beheld for the first time the face of Jackson McCall Ruggedly handsome and her noble rescuer she knew in that moment he would forever hold captive her heart as he then held her life in his protective arms Yet she was a nameless beauty haunted by wisps of visions from the past How could she ever hope he would return the passionate devotional love she secreted for him when her very existence was a riddle Fire in California's Ecosystems Jan W. van Wagtendonk, 2018-06-08 Fire in California's Ecosystems describes fire in detail both as an integral natural process in the California landscape and as a growing threat to urban and suburban developments in the state Written by many of the foremost authorities on the subject this comprehensive volume is an ideal authoritative reference tool and the foremost synthesis of knowledge on the science ecology and management of fire in California Part One introduces the basics of fire ecology including overviews of historical fires vegetation climate weather fire as a physical and ecological process and fire regimes and reviews the interactions between fire and the physical plant and animal components of the environment Part Two explores the history and ecology of fire in each of California's nine bioregions Part Three examines fire management in California during Native American and post Euro American settlement and also current issues related to fire policy such as fuel management watershed management air quality invasive plant species at risk species climate change social dynamics and the future of fire management This edition includes critical scientific and management updates and four new chapters on fire weather fire regimes climate change and social dynamics *Marines*, 1992 **General Technical Report RM.**, 1996 **The Sonoran Desert Tortoise** Thomas R. Van Devender, 2006-09-01 One of the most recognizable animals of the Southwest the desert tortoise *Gopherus agassizii* makes its home in both the Sonoran and Mohave Deserts as well as in tropical areas to the south in Mexico Called by Tohono O'odham people komikced or shell with living thing inside it is one of the few desert creatures kept as a domestic pet as well as one of the most studied reptiles in the world Most of our knowledge of desert tortoises comes from studies of Mohave Desert populations in California and Nevada However the ecology physiology and behavior of these northern populations are quite different from those of their southern Sonoran Desert and tropical cousins which have been studied much less Differences in climate and habitat have shaped the evolution of three races of desert tortoises as they have adapted to changes in heat rainfall and sources of food and shelter as the deserts developed in the last ten million years This book presents the first comprehensive summary of the natural history biology and conservation of the Sonoran and Sinaloan desert tortoises reviewing the current state of knowledge of these creatures with appropriate comparisons to Mohave tortoises It condenses a vast amount of information on population ecology activity and behavior based on decades of studying tortoise populations in Arizona and Sonora Mexico and also includes important material on the

care and protection of tortoises Thirty two contributors address such topics as tortoise fossil records DNA analysis and the mystery of secretive hatchlings and juveniles Tortoise health is discussed in chapters on the care of captives and original data are presented on the diets of wild and captive tortoises the nutrient content of plant foods and blood parameters of healthy tortoises Coverage of conservation issues includes husbandry methods for captive tortoises an overview of protective measures and an evaluation of threats to tortoises from introduced grass and wildfires A final chapter on cultural knowledge presents stories and songs from indigenous peoples and explores their understanding of tortoises As the only comprehensive book on the desert tortoise this volume gathers a vast amount of information for scientists veterinarians and resource managers while also remaining useful to general readers who keep desert tortoises as backyard pets It will stand as an enduring reference on this endearing creature for years to come

Desert Grassland Mitchel P. McClaran,Thomas R. Van Devender,2023-05-23 The mixed grass and shrub vegetation known to scientists as desert grassland is common to the basins and valleys that skirt the mountain ranges throughout southwestern North America extending from Arizona New Mexico and Texas down through thirteen Mexican states This variegated ground cover is crucial to life in an arid environment The Desert Grassland offers the most comprehensive study to date of these flora and the rich biotic communities they support Leading experts in geography biology botany zoology and geoscience present new research on the desert grassland and review a vast amount of earlier work They reveal that present day grasses once grew in the ice age forests that existed in these areas before the climate dried and the trees vanished and how the intensity and frequency of fire can influence the plant and animal species of the grassland They also document how the influence of humans from Amerindians to contemporary ranchers public land managers and real estate developers has changed the relative abundance of woody and herbaceous species and how the introduction of new plants and domesticated animals to the area has also affected biodiversity The book concludes with a review of the attempts both failed and successful to reestablish plants in desert grasslands affected by overgrazing drought and farm abandonment Meticulously researched and copiously illustrated The Desert Grassland is a major contribution to ecological literature For advanced lay readers as well as students and scholars of history geography and ecology it will be a standard reference work for years to come

Cultural Hybridity and the Environment Kirsten Maclean,2015-02-07 This book highlights the importance of diversity in overcoming issues of social and environmental degradation It presents conceptual and practical strategies to celebrate local and Indigenous knowledge for improved community development and environmental management David Harvey has proclaimed The geography we make must be a peoples geography This clarion call challenges geographers around the world to consider the power and potential of geographic knowledge as the basis for social action a call this book answers providing readers the theoretical and conceptual tools needed to understand the social world and empowering them to mobilize social change The author uses empirical case studies of two environmental management and community development projects to document how knowledge generation is essentially locally situated and socially derived In doing so she charts a path for moving beyond what Vandana Shiva so aptly describes as monocultures of the mind The book argues that local and Indigenous knowledge must not be seen in opposition to scientific knowledge as none of these knowledge traditions hold all the answers to localized socio environmental problems Rather as the author explores through a set of processes and strategies to enable support and celebrate cultural hybridity at the local environmental governance scale these respective knowledge systems can learn to speak to each other Such dialogue has the potential to support more sustainable outcomes at multiple environmental governance locales This book will be of interest to everyone involved in environmental policy planning or politics and for those who want to make this planet a more sustainable and just place Dry Times Mark Stafford Smith,Julian Cribb,2009 With knowledge from our deserts Australians can reshape the human story Dry Times Blueprint for a Red Land provides new insights into how our desert environments and institutions work and how this affects the people living in them Aboriginal and non Aboriginal alike Wildland Firefighter: Principles and Practice, Revised Joseph D.
