Advanced Metaheuristic Algorithms and Their Applications in Structural Optimization Ali Kaveh, Kiarash Biabani Hamedani, 2022-09-17 The main purpose of the present book is to develop a general framework for population based metaheuristics based on some basic concepts of set theory The idea of the framework is to divide the population of individuals into subpopulations of identical sizes Therefore in each iteration of the search process different subpopulations explore the search space independently but simultaneously The

framework aims to provide a suitable balance between exploration and exploitation during the search process. A few chapters containing algorithm specific modifications of some state of the art metaheuristics are also included to further enrich the book. The present book is addressed to those scientists, engineers and students who wish to explore the potentials of newly developed metaheuristics. The proposed metaheuristics are not only applicable to structural optimization problems but can also be used for other engineering optimization applications. The book is likely to be of interest to a wide range of engineers and students who deal with engineering optimization problems.

Diseño de concreto reforzado Jack C. McCormac, Russell H. Brown, 2017-07-20. El concreto es una mezcla de arena, grava, roca triturada entre otros materiales que se encuentran unidos en una masa rocosa por medio de una pasta de cemento y agua. Sin embargo a pesar de que este material tenga una alta resistencia a la compresión, no pasa lo mismo con su resistencia a la tensión. A partir de esto encontramos la importancia del concreto reforzado ya que, gracias al refuerzo de acero del cual está hecho, posee una alta resistencia a la tensión. El acero de refuerzo es también capaz de resistir fuerzas de compresión y se usa en columnas así como en otros miembros estructurales.
