Determination of a Solubility Product Constant

Purpose: To prepare and investigate solutions of Pb^{2+} and I^- , determining solubility concentrations, and then determine corresponding values. Calculate also solubility product constant of PbI_2 at different temperatures.

Safety: Concentrated acetic acids, Nitric acid, potassium iodide

Procedure:

- When is a solution said to be saturated?

A solution is saturated when the rate of dissolving is equal to the rate of crystallization, meaning that no more solute will be dissolved.

- What quantities are used to represent the solubility of a substance in a liquid environment?

The coefficient of each product in balanced equation divided by that number (e.g. Ca^{2+} coefficient).

- What happens when the solubility [] of ions substituted into a Ksp expression equals the actual Ksp?

A mixture that solution is either just saturated or that the fully saturated solution will fall out of the solution and crystallizing solids.
