**MOBIMEDIA 2020** Lin Yun, Tu Ya, Wang Meiyu, 2020-11-19 We are delighted to introduce the proceedings of the 13th edition of the 2020 European Alliance for Innovation EAI International Conference on Mobile Multimedia Communications MOBIMEDIA. This conference has brought researchers, developers and practitioners around the world who are leveraging and developing multimedia coding, mobile communications and networking fields. Developing and leveraging multimedia coding, mobile communications and networking fields requires adopting an interdisciplinary approach where multimedia networking and physical layer issues are addressed jointly. Basic theories, key technologies and Artificial Intelligence for next generations wireless communications, intelligent technologies for subspace learning and clustering of high dimensional data, security and safety communication networks and coding analysis, electromagnetic and media access control, D2D and IoT multimedia platform and analysis, new energy and smart city vision and images analysis systems and applications, case studies and prediction and educational application are research challenges that need to be carefully examined when designing new mobile media architectures. We also need to put a great effort in designing applications that take into account the way the user perceives the overall quality of the provided service. Within this scope, the MOBIMEDIA 2020 was intended to provide a unique international forum for researchers from industry and academia to study new technologies, applications and standards. Original unpublished contributions are solicited that can improve the knowledge and practice in the integrated design of efficient technologies and the relevant provision of advanced mobile multimedia applications.
