Conservation Agriculture in Africa Saidi Mkomwa, Amir H. Kassam, 2022-01-11 Tillage agriculture has led to widespread soil and ecosystem degradation globally and more particularly in the developing regions This is especially so in Africa where traditional agricultural practices have become unsustainable due to severe exploitation of natural resources with negative impacts on the environment and food system In addition agricultural land use in Africa today faces major challenges including increased costs climate change and a need to transform to more sustainable production intensification systems Conservation Agriculture has emerged as a major alternative sustainable climate smart agriculture approach in Africa and has spread to many African countries in the past decade as more development and research including in sustainable mechanization has enabled its extension and uptake It is key to transforming Africa s agriculture and food system given its ability to restore soil health biodiversity and productivity of millions of smallholder farms as well as larger scale farms This book is aimed at all agricultural stakeholders in the public private and civil sectors in Africa engaged in supporting the transformation of conventional tillage agriculture to Conservation Agriculture The book will be of interest to researchers academics students development stakeholders public and private sector investors and policy makers as well as institutional libraries across the world *Conservation Agriculture for Africa* Amir H Kassam, Saidi Mkomwa, Theodor Friedrich, 2016-12-14 Tillage agriculture has led to widespread soil and ecosystem degradation globally This is especially so in Africa where traditional and modern tillage based agricultural practices have become unsustainable due to severe disturbance and exploitation of natural resources with negative impacts on the environment and rural livelihoods In addition agriculture in Africa today faces major challenges including increased costs of production and energy the effects of climate change and the lack of an effective paradigm for sustainable intensification especially for small and medium size holdings Africa is facing a serious challenge to food security and as a continent has not advanced towards eradicating hunger In addition the population is still growing much faster than on most other continents This pressure has led to the emergence of no till conservation agriculture as a serious alternative sustainable agriculture paradigm In Africa in recent years conservation agriculture techniques and methods have spread to many countries as greater development education and research effort are directed towards its extension and uptake This book is aimed at agricultural researchers and scientists educationalists and agricultural service providers institutional leaders and policy makers working in the fields of sustainable agriculture and international development and also at agroecologists conservation scientists and those working on ecosystem services **Proceedings of the FAO Global Conference on Sustainable Agricultural Mechanization** Telemans, B. (ed.), Aschauer, N. (ed.), Kienzle, J. (ed.), Xia, J. (ed.), 2024-06-05 The Global Conference on Sustainable Agricultural Mechanization GAMC organized by FAO from 27 to 29 September 2023 provided a neutral platform for global stakeholders to discuss sustainable agricultural mechanization for agrifood systems transformation The conference covered various

themes like crop production post harvest and agroprocessing climate change and resilience digitalization and automation supply chain and standards models and multistakeholder engagement and creating an enabling environment The proceedings feature abstracts of speeches and presentations and culminate in a compelling call to action to guide future efforts for promoting sustainable agricultural mechanization towards 2030 and beyond

Conservation Agriculture and Climate Change Ritesh Saha,Dhananjay Barman,Madhusudan Behera,Gouranga Kar,2022-12-08 Conventional tillage and burning crop residues has degraded the soil resource base and intensified soil degradation with concomitant decrease in crop production capacity The emerging issue of global warming coupled with greenhouse gases emissions has further aggravated the scenario Conservation agriculture helps in reducing many negative effects of conventional agriculture such as soil erosion soil organic matter decline water loss soil physical degradation and fuel use Conservation Agriculture helps improve biodiversity in the natural and agro ecosystems Complemented by other good agricultural practices including the use of quality seeds integrated pest nutrient and water management Conservation Agriculture provides a base for sustainable intensification of the agricultural production system Moreover the yield levels in Conservation Agriculture systems are higher than traditional intensive tillage systems with substantially less production costs This book provides comprehensive understanding of the subject with topics related to climate change mitigation strategies approaches and impact of conservation agriculture on natural resource management This book is co published with NIPA Taylor and Francis does not sell or distribute its print and electronic editions in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Sustainable agricultural mechanization in China Food and Agriculture Organization of the United Nations,Yang, M.,Jiang, S.,2023-01-20 Sustainable agricultural mechanization covers all levels of farming and processing technologies and takes into consideration technological economic social environmental and cultural aspects when contributing to the sustainable development of agrifood systems This publication strives to comprehensively and systematically summarize the status and strategies of China s agricultural mechanization development its impacts experiences and practices and business models Furthermore the publication investigates the related investment and policy recommendations to reach the goal of agricultural and rural modernization by 2035 to drive smallholder farmers to enter modern agriculture and to achieve sustainable development It is estimated that by 2035 agricultural production in China will predominantly be mechanized The concept of integrating mechanization and digitalization will be applied to agricultural mechanization management and operation monitoring and services and mechanization will comprehensively support all agricultural and rural modernization The development of sustainable agricultural mechanization in China provides cases and examples of innovations with global value not only for developing countries but in particular for middle income countries and emerging countries

Advances in Conservation Agriculture Volume 1 Prof Amir Kassam,2020-01-21 Reviews the development of CA systems globally and elaborates on science underlying the key CA system components Assesses the latest evidence on improving soil and crop

health and CA system resilience through the application of the core CA system principles Includes case studies reviewing current science on optimising CA cropping systems involving cereal legume horticultural and tree crops as well as integrating livestock in CA systems

The State of Food and Agriculture 2022 Food and Agriculture Organization of the United Nations,2022-11-01 Automation has been shaping world agriculture since the early twentieth century Motorized mechanization has brought significant benefits in terms of improved productivity reduced drudgery and more efficient allocation of labour but also some negative environmental impacts More recently a new generation of digital agricultural automation technologies has appeared with the potential to further enhance productivity as well as resilience while also addressing the environmental sustainability challenges driven by past mechanization The State of Food and Agriculture 2022 looks into the drivers of agricultural automation including the more recent digital technologies Based on 27 case studies the report analyses the business case for adoption of digital automation technologies in different agricultural production systems across the world It identifies several barriers preventing inclusive adoption of these technologies particularly by small scale producers Key barriers are low digital literacy and lack of an enabling infrastructure such as connectivity and access to electricity in addition to financial constraints Based on the analysis the publication suggests policies to ensure that disadvantaged groups in developing regions can benefit from agricultural automation and that automation contributes to sustainable and resilient agrifood systems

The Solar Corridor Crop System C. LeRoy Deichman,Robert J. Kremer,2019-06-12 The Solar Corridor Crop System Implementation and Impacts presents a case study format on the planning and implementation of alternative cropping systems designed to maximize incident sunlight and bio support of all crops in a rotation system The book describes the basic component of the system an increased access point of incident sunlight between each row or pairs of rows that enables a more uniform vertical distribution of incident sunlight to chloroplasts within the entire corn leaf canopy While the production environment and environment specific genetics determine the performance potential of this principle by maximizing the principles that light is basic to crop yield a solar corridor ultimately contributes to increased grain yield Written by experts who were integral in the development of solar corridor systems and providing real world examples of the methods challenges and future prospects this book will be valuable for those seeking to increase yield per acre through both primary and cover crops Introduces readers to the concept

of alternative row cropping and its implementation Presents real world experience including challenges and solutions Encourages research in maximizing photosynthesis impact on crop yield *Advances in Conservation Agriculture Volume 3* Prof Amir Kassam,2022-02-08 Summarises current research on the adoption of Conservation Agriculture CA principles in different regions around the world Highlights the emergence of CA as a key alternative to tillage based agriculture Reviews the challenges of effective implementation of CA in different contexts e g drier conditions poor soil quality **Smart Technologies for Sustainable Smallholder Agriculture** David Chikoye,Therese Gondwe,Nhamo Nhamo,2017-04-07 Smart Technologies for Sustainable Smallholder Agriculture Upscaling in Developing Countries defines integrated climate smart agricultural technologies ICSAT as a suite of interconnected techniques and practices that enhance quantity and quality of agricultural products with minimum impact on the environment These ICSAT are centered on three main pillars increased production and income adaptation and resilience to climate change and minimizing GHG emissions This book brings together technologies contributing to the three pillars explains the context in which they can be scaled up and identifies research and development gaps as areas requiring further investigation It stresses the urgency in critically analyzing and recommending ICSAT and scaling out the efforts of both developing and disseminating these in an integrated manner The book discusses synthesizes and offers alternative solutions to agriculture production systems and socio economic development It brings together biophysical and socioeconomic disciplines in evaluating suitable ICSAT in an effort to help reduce poverty and food insecurity Highlights the research gaps and opportunities on climate smart agricultural technologies and institutional arrangements Provides information on institutional engagements that are inclusive of value chain actors that support partnerships and the development of interactive platforms Elaborates some of the effects of climate extremes on production and socioeconomic development on small farms whose impact has potentially large impact **Agricultural mechanization policy options in Rwanda** Takeshima, Hiroyuki,Benimana, Gilberthe,Spielman, David J.,Warner, James,2024-05-13 This paper summarizes general demand and supply side issues for agricultural mechanization based on recent studies that focus on experiences and evidence from both Africa and Asia The paper provides typologies of agricultural mechanization in Rwanda along with policy options within the context of its current mechanization support strategies Provincial variations in agroecology and cropping systems irrigated rainfed systems farm size and labor use intensity among other factors characterize the key types of mechanization use in Rwanda Support for mechanization in Rwanda can be broadly tailored to a irrigated medium scale farmers in the Eastern province and Kigali b rainfed medium scale farmers in the Eastern and Southern provinces c rainfed small scale highland farmers in the Northern province and d irrigated small scale farmers in the Western province Recent experiences in other countries with rugged terrain and smallholder farming systems similar to Rwanda suggest that significant growth in the use of tractors is possible in the medium term among smallholders cultivating rainfed maize and legumes in addition to irrigated rice However farm wages

may still be too low in Rwanda and tractor hiring fees may still be too high to induce a shift to mechanization in the short term Therefore it may be advisable for policy support for mechanization to focus on improving the understanding of mechanization needs among each type of farmers identified knowledge of suitable machines and required skills for their operations and maintenance Such efforts should also balance the need to develop competitive markets and supply networks for promising machines parts and repair services at a viable and integrated market scale

Transforming Agriculture in Southern Africa Richard A. Sikora,Eugene R. Terry,Paul L.G. Vlek,Joyce Chitja,2019-11-27 This book provides a synthesis of the key issues and challenges facing agriculture and food production in Southern Africa Southern Africa is facing numerous challenges from diverse issues such as agricultural transformations growing populations urbanization and climate change These challenges place great pressure on food security agriculture water availability and other natural resources as well as impacting biodiversity Drawing on case studies from Lesotho Malawi Mozambique Namibia South Africa Swaziland Tanzania Zambia and Zimbabwe the chapters in this book consider these challenges from an interdisciplinary perspective covering key areas in constraints to production the most important building blocks of good farming practices and established and emerging technologies This book will be a valuable support for informing new policies and processes aimed at improving food production and security and developing sustainable agriculture in Southern Africa This informative volume will be key reading for those interested in agricultural science African studies rural studies development studies and sustainability It will also be a valuable resource for policymakers governmental and nongovernmental organizations and agricultural practitioners This title has been made available as Open Access under a Creative Commons Attribution Non Commercial No Derivatives CCBY NC ND license and can be accessed here <https://www.taylorfrancis.com/books/e/9780429401701>

Soil Carbon Dynamics in Indian Himalayan Region Gaurav Mishra,Krishna Giri,Arun Jyoti Nath,Rosa Francaviglia,2023-12-07 The contributed volume assimilates the knowledge experience and exciting aspects of soil carbon research in the Indian Himalayan region It includes different aspects and factors associated with soil carbon sequestration in the region one of the biodiversity hot spots and highly vulnerable to climatic change impacts Information on different aspects of soil organic carbon dynamics concerning adaptive land management practices and anthropogenic impacts is covered Further topics include applying advanced tools and techniques to soil carbon vis a vis soil erosion research This book is of interest to researchers and policymakers involved in soil carbon research and offer ideas to enhance the soil carbon in the region concerned In addition the book will provide up to date information for researchers interested in soil carbon research for the maintenance of soil quality and fertility in the climate vulnerable Indian Himalayan region
