Mapping of Sexual & Gender Based Violence Services in Kenya Kenya. National Commission on Gender and Development, 2010 COVID-19 and the Right to Health in Africa Ebenezer Durojaye, Roopanand Mahadew, 2024-05-28 This collection draws upon a range of thematic and regional case studies and uses the right to health as a normative framework to explore the devastating impact of the COVID 19 pandemic in Africa Drawing lessons from across the continent the book discusses the challenges faced by African states seeking to ensure the availability accessibility and quality of health care in the context of the COVID 19 pandemic In particular the volume explores the impact of the pandemic on the right to health of vulnerable and marginalized groups such as women children elderly persons with disabilities refugees and asylum seekers and people from disadvantaged communities Due to the poor funding of the healthcare systems access to health related services was limited to these groups in many African countries thereby leading to avoidable COVID 19 related deaths through shortages of vital supplies including diagnostic tests ventilators and oxygen cylinders Chapters in the volume also explore the contentious issues of vaccine mandates equity resource allocation and the rights of healthcare providers during the pandemic

This collection will be of interest to students of public health human rights and the social sciences as well as to academics and policymakers with an interest in the nexus between the COVID 19 pandemic and public health policy in Africa

societies with which they are purportedly associated Moral logics see people thinking of inequalities as fair according to higher or ethical principles such as meritocracy When relying on cultural institutional logics people view economic inequalities as consistent with established or emerging outlooks policies or organizational arrangements Using group ethnic logics people justify inequalities on the basis of hierarchical distinctions between superior and inferior collectivities These logics do not exist in isolation they often interact with each other and inevitably function in particular political economic and cultural contexts With contributors from across the world and the social sciences evidence comes from North and South America Europe and Asia Attention goes not only to those in positions of privilege but also those in vulnerable positions who despite their conditions look favorably upon inequalities With original analyses employing a wealth of methodological approaches the book offers a compelling investigation of the logics of acceptance their variations and intersections and how we may move toward a less unequal world Chapter 2 of this work is available under the terms of a CC BY NC ND 4 0 International open access licence This part of the work is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations

The Struggle for Health David Sanders, 2023-02-27 The first edition of *The Struggle for Health* was published in 1985 and was widely acclaimed by those seeking a broader and deeper political understanding of ill health beyond the medical model of care It was a revolutionary book charting new ways of understanding and tackling the causes of ill health and suggesting strategies to enable health for all This second edition includes health problems that have emerged since the 1980s notably HIV AIDs COVID 19 and other epidemics and the increase in non communicable diseases such as cardiovascular disease and diabetes It examines some of the health impacts of globalization specifically on the food and pharmaceutical value chains and considers the consequences of climate change on the health of populations However this edition does not depart from the core message of the original book Health for All can only be achieved through a more equitable distribution of wealth resources and power *The Struggle for Health* Second Edition utilises the same approach as the first with a narrative that begins with diseases then describes historical trends and the limitation of the medical and commercial model of care At each juncture it asks the question WHY why do people especially children still die in large numbers throughout the world from wholly preventable diseases Why is it that appropriate provision for health care is not available to every individual in the world What changes can be made to improve this situation Most importantly this edition presents a strengthened call to action building upon the original work and advocating for systemic changes to ensure justice and equity in health for all
