**Learner English** Michael Swan, Bernard Smith, 2001-04-26 This updated edition is a practical reference guide which compares the relevant features of a student's own language with English helping teachers to predict and understand the problems their students have

Learner English has chapters focusing on major problems of pronunciation grammar vocabulary and other errors as well as new chapters covering Korean Malay Indonesian and Polish language backgrounds

**Euro-English** Sandra Mollin, 2006

**Learner English** Michael Swan, Bernard Smith, 1987-08-27 As a teacher of English as a foreign or second language have you ever wished you knew more about your students mother tongues

Learner English is a practical reference book which compares the relevant features of the students own languages with English helping teachers to predict and understand the problems their students have

The nineteen chapters each of which covers one language background are written by specialists with experience in teaching students from the areas concerned

The chapters describe and explain the most important typical pronunciation grammar vocabulary and other mistakes of learners who speak Dutch Flemish Scandinavian languages except Finnish German French Italian Spanish Catalan Portuguese Greek Russian Farsi Arabic Turkish Indian languages West African languages Swahili Japanese Chinese Vietnamese and Thai

The book is accompanied by a cassette with authentic examples of the various accents described in the book

Working with Words Ruth Gairns, Stuart Redman, 1986 A practical guide on how to select organise and teach vocabulary to students of all levels

**Error Analysis** Bernd Spillner, 1991-04-12 Errors are information

In contrastive linguistics they are thought to be caused by unconscious transfer of mother tongue structures to the system of the target language and give information about both systems

In the interlanguage hypothesis of second language acquisition errors are indicative of the different intermediate learning levels and are useful pedagogical feedback

In both cases error analysis is an essential methodological tool for diagnosis and evaluation of the language acquisition process

Errors too give information in psychoanalysis e.g. the Freudian slip in language universal research and in other fields of linguistics such as linguistic change

This bibliography is intended to stimulate study into cross language cross discipline and cross theoretical as well as for language universal use of the numerous but sometimes hard to come by error analysis studies

5398 titles covering the period 1578 up to 1990 with work in more than 144 languages and language families are cited cross referenced and described

The subject areas covered are numerous

For example Theoretical Linguistics Linguistic Typology Cognitive Linguistics Historical Linguistics Language Change Applied Linguistics e.g. Speech Disorders Translation Mother Tongue Acquisition Foreign Language Learning Negative Transfer Intralingual and Interlingual Errors Psychoanalysis Slips of the Tongue Typography Shorthand Clinical Linguistics and Speech Pathology Reading Research Automatic Error Detection Contact Linguistics Code switching Interference etc
