Berube,2010-06-01 American science education is in trouble As the United States continues to lag behind other nations in science achievement the question is asked how can we better get our students excited and inspired by science This is the science teacher s duty The irony of the education profession is that some of the most important aspects of it are the hardest to measure and replicate The things that matter most can be the hardest to quantify Some teachers can know the different learning styles intelligences and brain preferences of their students They can know best practices of how to deliver instruction They can do all these things and more but still not convey imagination and passion for science to their students But some science teachers do inspire These special teachers seem to possess something the others don t but what is it Exceptional science teachers make us feel better about ourselves through their teaching of science and bring us to a higher quality of life as a result while some science teachers can be the leading researchers in their fields yet leave us flat What is the recipe for this unique special teacher And why is it so hard to explain and describe The objective of this book is to uncover these aspects of teaching that are so hard to measure and quantify This is achieved through interviewing people who are either current or retired teachers or who were positively affected by a teacher and also through case studies of exceptional teachers in order to quantify and explain the exact traits and personality quirks of these exceptional people The contribution to the field of education this book hopes to achieve is the examination of the question why do some teachers have that X factor what exactly is it and how can we all have it **Handbook of Research on Global Issues in Next-Generation Teacher Education** Keengwe, Jared,Mbae, Justus G.,Onchwari, Grace,2016-02-17 There is no question that all aspects of modern life have been imbued with technology In education students are becoming increasingly savvy in their use of the myriad technologies and virtual tools and must be taught adequate complimentary skills to be effective in the 21st century workforce To answer this call teachers education must reflect modern demands by integrating the use of these tools as part of their teaching practices The Handbook of Research on Global Issues in Next Generation Teacher Education addresses this need with precise comprehensive research and case studies With strategies and emerging research on the empowerment of tomorrow s inspirational educational leaders this handbook of research outlines the challenges benefits and opportunities of engaging teachers with the 21st century skills their students require Teachers students of education administrators and policy makers will find this publication offers a number of innovative solutions *Effective Supervision* Robert J. Marzano,Tony Frontier,David Livingston,2011-05-09 In

Effective Supervision Robert J Marzano Tony Frontier and David Livingston show school and district level administrators how to set the priorities and support the practices that will help all teachers become expert teachers Their five part framework is based on what research tells us about how expertise develops When these five conditions are attended to in a systematic way teachers do improve their skills A well articulated knowledge base for teaching Opportunities for teachers to practice specific strategies or behaviors and to receive feedback Opportunities for teachers to observe and discuss expertise Clear criteria for success and help constructing professional growth and development plans Recognition of the different stages of development progressing toward expertise The focus is on developing a collegial atmosphere in which teachers can freely share effective practices with each other observe one another s classrooms and receive focused feedback on their teaching strategies The constructive dynamics of this approach always keep in sight the aim of enhancing students well being and achievement As the authors note The ultimate criterion for expert performance in the classroom is student achievement Anything else misses the point
