Age of Auto Electric Matthew N. Eisler,2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In Age of Auto Electric Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a

consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking's transformation into a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the development of better batteries Age of Auto Electric instead focuses on changing environmental and socioeconomic conditions energy and environmental policies systems of energy conversion and industrial production and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises compromises new problems and unintended consequences that enterprise has entailed *Hearing Eyes* , **"Hier ist Krieg"** Markus Götz,2021-09-27
