Automated Trading with Genetic-Algorithm Neural-Network Risk Cybernetics Lanz Chan,2015 Recent years have witnessed the advancement of automated algorithmic trading systems as institutional solutions in the form of autobots black box or expert advisors However little research has been done in this area with sufficient evidence to show the efficiency of these systems This paper builds an automated trading system which implements an optimized genetic algorithm neural network GANN model with cybernetic concepts and evaluates the success using a modified value at risk MVaR framework The cybernetic engine includes a circular causal feedback control feature and a developed golden ratio estimator which can be applied to any form of market data in the development of risk pricing models The paper applies the Euro and Yen forex rates as data inputs It is shown that the technique is useful as a trading and volatility control system for institutions including central bank monetary policy as a risk minimizing strategy Furthermore the results are achieved within a 30 second timeframe for an intra week trading strategy offering relatively low latency performance The results show that risk exposures are reduced by four to five times with a maximum possible success rate of 96% providing evidence for further research and development in this area 　　 *Expert Advisor Programming for MetaTrader 4* Andrew R. Young,2015-02-21 Brand new and fully updated for the latest versions of MetaTrader 4 Expert Advisor Programming for MetaTrader 4 is a practical guide to programming expert advisors in the MQL4 language Leverage the latest features imported from the MQL5 language including object oriented programming enumerations structures and more This book will teach you the following concepts The basics of the MQL4 language including variables and data types operations conditional and loop operators functions classes and objects event handlers and more Place modify and close market and pending orders Add a stop loss and or take profit price to an individual order or to multiple orders Close orders individually or by order type Get a total of all currently
