Form-Focused Instruction and Teacher Education Sandra Fotos, Hossein Nassaji, 2013-12-02 An overview of form focused instruction as an option for second language grammar teaching It combines theoretical concerns classroom practices and teacher education **Improving Learning in Secondary Schools** Kenneth Ndifor Tangie, 2015-09-10 Improving Learning in Secondary Schools brings together in a succinct comprehensive and thought provoking manner several dimensions of classroom assessment feedback in one volume It is based on the principle that students need feedback on their work and conduct at school in order to be able to correct misconceptions and omissions that can render them incapable of making progress and learning in a given subject The book reports on a doctoral study that examined teachers feedback practice and its relation to student learning in secondary schools It presents a critical fine grained classification and analysis of positive neutral and negative feedback categories in teacher talk and writing which could generate a globally applicable typology and theory of classroom feedback For some time now formative assessment generated feedback has been widely recommended for classrooms thanks mainly to compelling research based evidence showing the relative merits of formative assessment types over more traditional summative assessment practices In this book it is suggested that the time has come to depart from such arguments because the mere presence of feedback in teacher talk and writing be it formative or summative is not enough to support learning Feedback like formal and informal instruction and assessment is not mediated in vacuo it is a social process taking place in a social setting conducted by on and for social actors One must also consider the

context especially the linguistic and socio cultural environment in which assessment feedback and learning occur but which also acts as a barrier and facilitator to successful feedback provision and uptake This argument should constitute a starting point for reflection debate and research into the effectiveness for learning of classroom assessment feedback Therefore whilst complementing previous work on this subject this book makes significant additions to a very important aspect of school life Primary and secondary school teachers university students academics and researchers as well as educationists and policy makers in the domain of educational assessment will find in it an inseparable companion and resource tool
