Market Rules Mark H. Rose, 2018-11-17 Although most Americans attribute shifting practices in the financial industry to the invisible hand of the market Mark H Rose reveals the degree to which presidents legislators regulators and even bankers themselves have long taken an active interest in regulating the industry In 1971 members of Richard Nixon's Commission on Financial Structure and Regulation described the banks they sought to create as supermarkets Analogous to the twentieth century model of a store at which Americans could buy everything from soft drinks to fresh produce supermarket banks would accept deposits make loans sell insurance guide mergers and acquisitions and underwrite stock and bond issues The supermarket bank presented a radical departure from the financial industry as it stood composed as it was of local savings and loans commercial banks investment banks mutual funds and insurance firms Over the next four decades through a process Rose describes as grinding politics supermarket banks became the guiding model of the financial industry As the banking industry consolidated it grew too large while remaining too fragmented and unwieldy for politicians to regulate and for regulators to understand until in 2008 those supermarket banks such as Citigroup needed federal help to survive and prosper once again Rose explains the history of the financial industry as a story of individuals

some well known like Presidents Kennedy Carter Reagan and Clinton Treasury Secretaries Donald Regan and Timothy Geithner and JP Morgan CEO Jamie Dimon and some less so though equally influential such as Kennedy s Comptroller of the Currency James J Saxon Citicorp CEO Walter Wriston and Bank of America CEOs Hugh McColl and Kenneth Lewis Rose traces the evolution of supermarket banks from the early days of the Kennedy administration through the financial crisis of 2008 and up to the Trump administration s attempts to modify bank rules Deeply researched and accessibly written Market Rules demystifies the major trends in the banking industry and brings financial policy to life

Financial Innovations and the Welfare of Nations Laurent L. Jacque, Paul M. Vaaler, 2012-12-06 The central question addressed in Financial Innovations and the Welfare of Nations is how the transfer of financial innovations from developed to developing economies can nurture the dynamics of emerging capital markets National capital markets can be positioned along a continuum ranging from embryonic to mature and emerged markets according to a decreasing national cost of capital criterion In the introductory chapter Laurent Jacque argues that newly emerging countries are handicapped by a high cost of capital due to incomplete and inefficient financial markets As capital markets graduate to higher level of emergedness their national firms avail themselves of a lower cost of capital that makes them more competitive in the global economy and spurs economic growth Skillful transfer of financial innovations to emerging markets often encourages the deregulation of the country s financial services sector This results into new conduits for a more efficient capital allocation process such as commercial paper securitized consumer finance and other disintermediated modes of financing which out compete traditional financial intermediaries mostly commercial banks reduce households cost of living and conjointly fuel the dynamics of emerging markets Our response to the central question of how the transfer of financial innovations can enhance the Wealth of Nations is to show that it reduces the cost of capital while not unduly increasing systemic risk Part I examines the relationship between financial innovations and systemic risk of the international financial system

Money and Capital Markets Peter S. Rose, 2003 This text analyzes the entire financial system and its component parts with an expanded discussion of the trend toward globalization of financial markets and institutions It also discusses all major types of financial instruments and provides a grounding in interest price determination
