the departure of an aircraft but also involves an endless number of operational issues in charge of qualified personnel for  
that purpose The figure of Aircraft Dispatcher was born with the need to guarantee the safety of both the aircraft and its  
occupants and other personnel on the ground The ICAO International Civil Aviation Organization recognizes the figure of  
Flight Dispatcher as a pillar in air safety As such commercial air companies must have a certain number of flight dispatchers  
depending on the size of their fleet Like pilots flight dispatchers must take a specific course on the aircraft in which they will  
operate their dispatch limiting themselves only to being able to dispatch this class of aircraft in each operation In simple  
words a Dispatcher authorized for an Airbus A320 aircraft could not legally dispatch a Boeing B737 aircraft The tasks of the  
Flight Dispatcher are several and include meteorology analysis NOTAMS analysis analysis of the condition of the aircraft and  
MEL analysis of cargo in holds passengers luggage weight centering aircraft swaying determination of speeds for the takeoff  
segment and other operational calculations Once the work is finished the Flight Dispatcher gives the pilots a folder with all  
the information collected so that they can make the final decision to operate the aircraft in one way or another The task of  
the Flight Dispatcher begins at the company s operations office usually located at each airport where the company operates  
Until the moment in which the pilot takes command of the operation and accepts the dispatch proposed by the Dispatcher the  
Dispatcher is the authority of the operation who decides if the aircraft is in a position to carry out the flight based on all the  
aforementioned variables This manual covers an introduction to the day to day job carried out by aircraft dispatchers flight

dispatchers or aircraft dispatchers variants of the job title and contemplates an analysis of the most important subjects for the position such as concepts about dispatch weight and balancing meteorology and planning A manual with all the didactics that characterizes the entire collection of the most awarded aeronautical library in America Flying Magazine ,1990-11
