(Org),2000 Edi o revista da carta de cores de solos Munsell Soil colors are most conveniently measured by comparison with a
color chart The collection of charts generally used with soils is a modified version of the collection appearing in the Munsell
Book of Color and includes only that portion needed for soils about one fifth of the entire range found in the complete edition
The nine charts in the Soil Collection display 322 different standard color chips systematically arranged according to their
Munsell notations on cards carried in a loose leaf notebook The arrangement is by the three dimensions that combine to
describe all colors and are known in the Munsell system as Hue Value and Chroma The Hue notation of a color indicates its
relation to Red Yellow Green Blue and Purple The Value notation indicates its lightness and the Chroma notation indicates its
strength or departure from a neutral of the same lightness The colors displayed on the individual Soil Color Charts are of
constant Hue designated by a symbol in the upper right hand corner of the card Vertically the colors become successively
lighter from the bottom of the card to the top in visually equal steps their value increases Horizontally they increase in
Chroma from left to right The Value notation of each chip is indicated by the vertical scale in the far left column of the chart
The Chroma notation is indicated by the horizontal scale across the bottom of the chart The nomenclature for soil color
consists of two complementary systems 1 Color names and 2 The Munsell *Standard soil color charts* Masatada
