Rich Mind Rich Man Proof3 20090831:

Rich Mind Rich Man Coert Coetzee,2009-09-01 Coert Coetzee is a successful property investor and has presented hundreds of seminars in various countries teaching his unique property investment methods In this book he first gives the reader step by step instructions in programming the mind for lasting success then takes the reader through the principles of his popular and unique investment methods These methods have already created more millionaires than all other methods put together Coetzee firmly believes that creating lasting wealth is a holistic process and his motto is A poor man with a rich mind is richer than a rich man with a poor mind but nobody is richer than a rich man with a rich mind *The Mind of A Rich Man* Dan Bob,2018-09-25 Getting rich involves shedding middle class values to get ahead to get more value and to make more money It involves playing your cards close to your chest posing a front hiding your true feelings sometimes revealing them at the right moment not showing anger during provocative situations getting into the grey areas and getting murkier reading between the lines of a deal and making use of possibilities within them finding loopholes and exploiting them and many more Middle class people are conditioned to believe in the most primitive forms of employment as most of the human species evolved from hunting and later from farming traditions The linear relationship between work and reward or input and output can be firmly and easily established in these primitive or ancient economic activities The rich however see through the subjective work on it and exploit it The rich man sees beyond the visible physical aspects of money and has an entirely different view of money The rich people are able to see the non linear relationship created through value addition and they exploit the value which at times is subjective On the contrary the middle class are conditioned to believe only in the objective world or the world of appearances The rich man does not engage in direct rendering of labor unless and until the task is of high value that will fetch him more value or money He knows other ways that can make him a lot of money and has plenty of calculations going on in his head on how to bring himself more money He trades value for money than labor He is ahead of others in evolution Rich people are also more evolved in their understanding of the non linear aspects on how money works and how their brain should work to get more value This book is designed to target the right areas in our brains to change the way we see the world other people money business and finances In order to target the right areas that cause changes the book explains these concepts in a highly succinct manner So if you are ready let s take a quick tour to change the way we see and think about money to move us in the right direction that will eventually help us live financially better lives and to get rich
