Information Society

Karamjit S. Gill, 2012-12-06 Human centredness A Challenge to Post industrial Europe The key power in industrial society has been linked to the possession of capital and factory In the information society it could be rather different If one accepts that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information the productive force of today and tomorrow could be more and more the human brain Making use of one's intelligence is always accompanied by positive emotion which in turn further activates the intelligence But unfortunately under present conditions workers of all levels live in fear anxiety and stress rather than desire and motivation The question of basic human ecology quality of life is therefore a major strategic factor It is precisely the opposite to the mechanisms of exclusion that currently dominate our society exclusion of young people through joblessness but also exclusion through technology as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats This is not idle theorizing it corresponds to concrete facts It is for example how some observers interpret the crisis at IBM Because its programs were less human friendly it was shaken to its foundations by Apple and Microsoft though it seems since to have learnt its lesson

### **The Participant**

Christopher M. Kelty, 2020-01-21 Participation is everywhere today It has been formalized measured standardized scaled up network enabled and sent around the world Platforms algorithms and software offer to make participation easier but new technologies have had the opposite effect We find ourselves suspicious of how participation extracts our data or monetizes our emotions and the more procedural participation becomes the more it seems to recede from our grasp In this book

Christopher M Kelty traces four stories of participation across the twentieth century showing how they are part of a much longer term problem in relation to the individual and collective experience of representative democracy Kelty argues that in the last century or so the power of participation has dwindled over time it has been formatted in ways that cramp and dwarf it even as the drive to participate has spread to nearly every kind of human endeavor all around the world The Participant is a historical ethnography of the concept of participation investigating how the concept has evolved into the form it takes today It is a book that asks Why do we participate And sometimes Why do we refuse
